

G. TIDAL REDUCERS

Preliminary reduction of each day's data was made using predicted tides from St. Petersburg, Florida.

Site 3074, Egmont Key, Egmont Channel is closest to the item investigated. Tides were corrected for high water - 2 hours 27 minutes, and for low water - 2 hours 24 minutes.

No portable guages were installed.

Upon receipt of actual tides from Rockville, Maryland tide reducers were entered in the wire drag volumes.
