

## E. TIDAL REDUCERS

*Survey accordion folder.*

Preliminary reduction of each day's work was done using predicted tides for station 2831 at Fernandina Beach for ITEM G, station 2821 at St. Mary's Entrance for ITEM I and station 2781 at St. Simon's Light for ITEM J. No predicted tide data was supplied, so this was extrapolated from tide tables. Tide curves for each day have been included in the data submitted herein. Actual tide data was requested from and supplied by the Rockville Office. See Attachment X.
