

G.6.a Mean-lower-low-water served as the tidal datum for this investigation. The reference tide station stands at Grand Isle, Louisiana (876-1724). A direct datum control was possible with a local tide station installed at Southwest Pass entrance light (876-0958).

G.6.b Height and time correctors provided by the Project Instructions for the Southwest Pass area are listed in Table G.6.B. Tide tables were applied on-line and during processing.

APPROVED TIDES WERE APPLIED DURING OFFICE PROCESSING

Table G.6.B: Tide Height and Time Correctors

Hydrographic Area	High Time	Low Time	Height Ratio
East of 089° 30.0' W	-1 hr	-1 hr	* 1.17
West of 089° 10.0' W	00 min	00 min	

G.6.c The project required no zoning.
