

Daily water level corrections were determined by readings taken from the ETG at Kenosha, Wisconsin (908-7052), and Racine, Wisconsin (908-7054) were used for the reduction of soundings during field processing. Approved daily heights were zoned from Racine, Wisconsin (908-7054) and Kenosha, Wisconsin (908-7052). An accompanying computer printout contains the parameters and the correctors.
