

Predicted tides for this project were provided on diskette by N/OES231 for the Bar Harbor, Maine reference station, number 841-3320.

All elevations and soundings on survey FE-407 are at the sounding datum of MLLW unless otherwise specified.

The sounding plot used predicted tides determined from Bar Harbor, Maine, with correctors designated in section 5.9 of the project instructions. Approved water levels were requested from the Product and Services Branch, Datums Section, N/OES231, in a letter dated December 5, 1994. A copy is appended to this report.\*

APPROVED TIDES AND ZONING WERE APPLIED DURING OFFICE PROCESSING.
