

The Coastal and Estuarine Oceanography Branch (N/OES334) through N/CS31 provided predicted tides for the project for the Yakutat, Alaska reference station (945-3220). HDAPS listings of the data used in generating tidal correctors are included in Appendix V* of this report. Tidal correctors as provided in a sketch faxed on 7-1-97 from HSD are shown on the appended Survey Information Summary report (*attached*).

No tide gauges were installed by RAINIER personal as part of this field examination. A request for approved tides was forwarded to N/OES23 in accordance with FPM 4.2.3. *Approved tide note, dated Oct. 3, 1997 is attached to this report.*
