

G.6(a) The tidal datum for this project is Mean Lower Low Water (MLLW). The operating tide station at Lewes, Delaware (855-7380) served as control for datum determination.

G.6(b) Zoning for this survey is consistent with the project instructions. HPTools was used for Tide table creation and was used for the application of Preliminary Water Level Data during data processing. See Appendix D.1(i) for zoning information.

Approved tides for F00453 were requested by letter to N/OPS1 dated November 22, 1999. See Appendix D.* *APPROVED TIDES AND ZONING HAVE BEEN APPLIED DURING OFFICE PROCESSING*
