March 26, 1927.

Hydrographic Sheet No. 503

This sheet covers only a small area, "San Buenaventura and vicinity," Santa Barbara Channel, California, by ~~A. MacBee~~ ^{J. Alden}, U. S. N., in 1855.

The soundings were reduced to a datum approximately $1\frac{1}{2}$ feet above mean lower low water and should be diminished by $1\frac{1}{2}$ feet to refer to the latter datum.

The original reductions appear to have depended upon tides observed by a lead line and are more or less rough and the data should be used with caution.

J. W. Lude

Chief, Division of Tides and Currents
