HYDROGRAPHIC SHEET NO. 709

This sheet includes part of the Gulf of Georgia, and the Northern entrance to Haro and Rosario Straits, Washington, by James Alden, U. S. N., in 1858 and 1859.

The plane of reference used for the reduction of soundings was the mean of a few selected lowest low waters, corresponding to a reading of 3.9 feet on the tide staff in Semiamoa Bay in 1858. To reduce the soundings to the plane of mean lower low water, add 1.5 feet.

February 9, 1927.
