CHIEF OF PARTY
F. S. Phelps

H-841.

Comparison of H-796 and H-841 showed that most of the soundings on H-796 had been transferred to H-841.

Investigation of the two sheets shows that they were done in the same area by the same party and in the same year.

H-841 seemed to be mostly development of some of the shoals on H-796.

There are no sounding records for H-796. The soundings taken on that sheet were copied by the field party into the records of H-841. Additional soundings were transferred from H-796 to H-841 and the latter sheet now shows all of the soundings which were plotted on the former.

H-796 was then listed as a boat sheet for H-841 and the number 796 left vacant in the register.

July 24, 1936.

J. A. McCormick.
