REPORT ON HYDROGRAPHIC SHEET NO. 1198C.  
(supplemental hydrography, Howell's Pt. to Nachell's Pt. Great South Bay, New York.)  
Dec. 1915.

The protracting was done in the field; also a portion of the plotting. I verified all positions by re-protracting; I verified plotted soundings, and plotted lines 1A to 38A (the small square of close work immediately off sta. Blue Pt.)

There is no descriptive report so far as I can ascertain, so I am unable to speak of the thoroughness of the work, being ignorant of its purpose; however no errors or inconsistencies were disclosed in the study of what little was executed; the lines off sta. Blue Pt. crossed nicely.

Soundings on lines 1A-38A will need verification as I made the original plotting of them. The note in sounding record should be heeded; these soundings were first numbered 30D to 68D.

*Colin R. Lamp*

*Lines plotted by E. R. H. verified by L. E. Bolinger*
