

11-28-30/EG

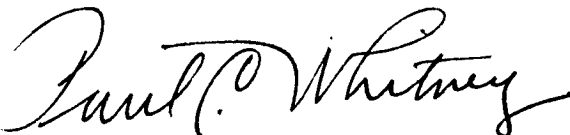

HYDROGRAPHIC SHEET No. 1228

MENDOCINO BAY, CALIFORNIA

by L. A. Senteller, 1872.

The plane of reference as stated on H. S. 1228 is "mean low water" reading 3.48 feet on tide staff at Big River Bridge.

The tide observations consisting of 16 high and 16 low waters, (daylight readings only), when compared with simultaneous readings at Fort Point, San Francisco, Calif., the plane of mean lower low water is approximately 1.9 feet on tide staff at Big River Bridge. Therefore, to refer the soundings on H. S. 1228 to the plane of mean lower low water subtract 1.6 feet from each sounding.

Chief, Division of Tides and Currents.
