HYDROGRAPHIC SHEET NO. 1897

Northern Part of Stephens Passage, S. E. Alaska  
By C. M. Thomas, 1888

From an examination of the original tide and sounding records it appears that the plane of reference used for the reduction of soundings on Hydrographic Sheet No. 1897 is approximate mean lower low water (4.8~~ft~~ on the tide staff at Taku Harbor) and not mean low water as stated on the sheet.

*E. V. Rude*

Chief, Division of Tides and Currents.
