Descriptive Report -

North Lake, Thompsons
between Grand & North Lakes,
and Monument-Stream to
head of low boat-navigation,

This survey embraces the hydrography
of Thompsons between Grand & North
Lakes and Monument-Stream
to head of low boat-navigation. The
only traffic on this lake and streams
is done by one stern wheel steamer
used for towing saws and
lumber rafts. There is very little or no
current - except during the Spring
freshets, when the water rises about
four feet above its natural level,

Stetman Army
Capt. C. H. Surry,
