Descriptive ReportHydrographic Sheet, Field No. 34 - Scale 1:100,000From Capw Rojo to Boca del Infierno.

The principal work on this sheet is the off shore soundings and the development of the 100 fathom curve west of Guayanilla, and the unsurveyed spot south of the entrance to Parguera, and is supplemental to the surveys of previous years in this region. In the work off Parguera nothing was developed that is a menace to navigation, but a well defined shoal ridge of small width was discovered running parallel and very close to the 100 fathom curve, with depths from 6-1/2 to 13 fathoms of water over it.
