REPORT

TO

Accompany Hydrographic Sheets

Nos. H-6881 to H-6909 inclusive

The surveys were made by U. S. Naval vessels during the seasons of 1933, 1934, and 1935.

The processing was done in the Hydrographic Office, Navy Department, Washington, D. C. A general comparison of the boat sheets with the smooth sheets indicates that the smooth sheets were replotted from the original sounding records making many adjustments in sounding lines and using depths corrected for tide, etc. This conclusion was supported by phone information from the Hydrographic Office.

Position numbers on the smooth sheets were left in pencil and many of them have become illegible. The boat sheets were microfilmed so that in case of necessity the position numbers can be recovered after the boat sheets are destroyed.

Sheets Nos. H-6881, 6882, 6883, 6884, 6885 W.D., 6886, 6887 W.D. 6888, 6889, 6890, and 6891 are registered with the H. O. number 305610 in the Field No. column, Index sheet 305610-13 shows general location of boatsheets and sounding records pertaining to them, and is filed with special diagrams.

Sheets Nos. H-6892, 6893, 6894, 6895, 6896, 6897, 6898, and 6899 are registered with the H. O. number 305614 in the Field No. column. Index sheet 305614-0 shows general location of smooth sheets, boatsheets and the sounding records pertaining to the latter, and is filed with special diagrams.

Sheets Nos. H-6900, 6901, 6902, 6903, 6904, 6905, 6906, and 6907 are registered with the H. O. number 305621 in the Field No. column. Index sheet 305621-100 shows the general location of the smooth sheets, boatsheets and the sounding records pertaining to the latter, and is filed with special diagrams.

Sheets Nos. H-6908 and 6909 are reconnaissance surveys. The tracing accompanying these sheets did not show any additional original information.

Letter of transmittal filed in charts under Hydrographic Office, Charts, Aleutian Islands. Surveys and data transferred 11-18-43 and 1-4-44.

Microfilm filed in room 1106
