DESCRIPTIVE REPORT

DA-10-12-71

(H-9239)

UMPQUA RIVER ENTRANCE, OREGON

A. PROJECT

This survey was accomplished according to Project Instructions OPR-498-DA-71, UMPQUA RIVER, OREGON dated 27 August 1971.

B. AREA SURVEYED

The area surveyed covers the entrance of the river between latitude 43°39'00"N and 43°41'00"N bounded to the west by longitude 124°14'15"W and continues up river to longitude 124°10'30"W. Up river the survey junctions with contemporary survey DA-10-11-71 (H-9238). The survey also junctions with DA-2.5-1-71 (H-9240) in the Winchester Bay area.

C. SOUNDING VESSEL

The following vessels were used to obtain soundings on this survey:

<u>VESSEL</u>	<u>POSITION NUMBER</u>	<u>COLOR</u>
Launch DA-1		Blue
Launch DA-2		Red

An abstract of positions can be found in the appendix.

D. SOUNDING EQUIPMENT

Raytheon DE-723 fathometers were used on this survey.

<u>VESSEL</u>	<u>FATHOMETER #</u>
Launch DA-1	214, 553
Launch DA-2	1276

Echo sounder corrections were determined from bar checks taken daily. Corrections to echo soundings can be found in a separate report titled "CORRECTIONS TO ECHO SOUNDERS OPR-498-DA-71". All soundings are in feet. The 120°W time meridian was used in all cases for this survey.

Soundings on the boatsheet were reduced using predicted tides based on predicted tides for the Umpqua River Entrance, Oregon. Two TC/TI tapes were necessary since two sounding vessels were used on the same day on several occasions.

E. SMOOTH SHEET

The smooth sheet will be constructed and plotted by the Processing Division, Pacific Marine Center, Seattle, Washington.

F. CONTROL

Visual three-point fixes were used for control on all portions of the survey. A single Decca "Sea-Fix" electronic control station was established to provide a line of position so the coxswain could get uniform spacing on portions of the sheet. All visual fixes were taken using existing second order control or newly established third order control. Third order control was established by intersection and traverse off of the existing 2nd order control. Existing second order control was plotted on the boatsheet by computer at the Processing Division, Pacific Marine Center. Other control was plotted on the boatsheet by the ship's survey department. See "GROUND CONTROL OPR-498-DA-71" for more information concerning ground control. The photogrammetric support data was received after the boatsheet was started and the ground control was established. Many signals were located which had been established by the U.S. Army Corps of Engineers as aids in dredging, and pre- and post-dredge surveys.

G. SHORELINE

Shoreline and shoal areas were traced onto the boatsheet from the following manuscripts:

TP-00209

TP-00208

Verification of the shoreline was carried out by the ship's commissioned officers and is covered in a separate report titled "FIELD EDIT REPORT OPR-498-DA-71". The smooth sheet should only use the "Advanced Manuscript" as there were numerous changes made to the manuscripts in the field edit.

H. CROSSLINES

The percentage of crosslines to lines of soundings is 10.5% or 11.5% compared to the total of 108.8%. All crossings are in agreement.

I. JUNCTIONS

A junction was made with contemporary survey DA-10-11-71 (H-9238). There is good agreement at the junction. ✓

J. COMPARISON WITH PRIOR SURVEYS

Comparison was made with the U.S. Army Corps of Engineers Pre-Dredge survey UI-1-439-16 April 1971 (1:3,000). Dredging in the channel was completed prior to work on boatsheet DA-10-12-71 and the boatsheet shows deeper soundings in dredged areas. Areas that were not dredged agree with soundings from the Corps of Engineers Pre-Dredge survey. ✓

The following pre-survey review items were investigated:

Item No. 1: The reported wave gage in Lat. $43^{\circ}39'00''$ N, Long. $124^{\circ}13'36''$ W was searched for but not located by fathometer. It is assumed that the gage is still there. It was not feasible to locate it with a fathometer and no divers were available during the search.

Item No. 2: Submerged ruins in Lat. $43^{\circ}40'24''$ N, Long. $124^{\circ}11'38''$ W were investigated. A line spacing of 25 meters was used to develop the area and excess soundings were plotted on an overlay that accompanies the boatsheet. The submerged ruins exist and should be shown on the chart.

Item No. 3: Submerged ruins in Lat. $43^{\circ}41'00''$ N, Long. $124^{\circ}11'23''$ W were investigated. Twenty-five meter spacing in the area was used to develop the existing ruins. Excess soundings were plotted on boatsheet overlay No. 1. The ruins exist and should be charted.

Item No. 4: Dolphins in Lat. $43^{\circ}41'17''$ N, Long. $124^{\circ}11'06''$ W do not exist.

Item No. 5: Dolphins in Lat. $43^{\circ}41'23''$ N, Long. $124^{\circ}10'57''$ W do not exist.

K. COMPARISON WITH THE CHART

Comparisons were made with NOS chart 6004. Soundings outside of the river entrance are in general agreement with those of the chart. Soundings in the entrance channel and in the river are not in good agreement in most cases. It was assumed that the frequent dredging by the Corps of Engineers has altered both the entrance and river depths. Deposition and scour of sediment in the river is also assumed to have altered some of the depths. ✓

L. ADEQUACY OF SURVEY

This survey is considered complete and adequate to supersede prior surveys.

M. AIDS TO NAVIGATION

Numerous fixed aids to navigation within the bounds of the survey have been located and are included in the Field Edit Report. Floating aids to navigation were located by sextant fixes with check angles and are included as detached positions on the boatsheet.

N. STATISTICS

VESSEL	NUMBER OF POSITIONS	NAUTICAL MILES SOUNDING LINES	BOTTOM SAMPLES	DP's
Launch DA-1	603✓	66.25✓	8✓	3✓
Launch DA-2	506✓	42.55✓	16✓	2✓

The total area surveyed is 4 nautical square miles. There are 7 sounding volumes with this survey. The soundings on the boatsheet were reduced using predicted tides for UMPQUA RIVER ENTRANCE, OREGON.

O. MISCELLANEOUS

Fathograms show that the bottom of the river is quite rough. As none of the river work was done with swell or surf conditions, fathograms were scanned for controlling depths where the bottom showed irregularity. It is assumed that these irregularities are sand ridges and are not rocks or solid objects.

The Winchester Bay area including the new boat basin was not surveyed on this sheet. A separate sheet was made at a scale of 1:2,500 for this area. For soundings in the area consult boatsheet DA-2.5-1-71 (H-9240).

P. RECOMMENDATIONS

There are no recommendations for this survey.

APPROVAL SHEET

Hydrographic Survey

DA-10-12-71

H-9239

OPR-498-DA-71

UMPQUA RIVER ENTRANCE, OREGON

The field work on this survey was accomplished under my supervision. Frequent inspections were made of the boatsheet and other records.

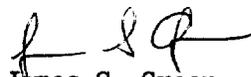

Gerald C. Saladin
CDR NOAA
Commanding Officer
NOAA Ship DAVIDSON

APPROVAL SHEET

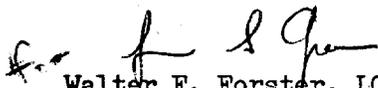

The smooth sheet has been inspected, is complete, and meets the requirements of the General Instructions for automated surveys and the Hydrographic Manual. (Note: All exceptions are listed in the Verifier's Report)

Examined and approved,

James S. Green
Supervisory Cartographic Technician

Approved and forwarded,

Walter F. Forster, LCDR, NOAA
Chief, Processing Division
Pacific Marine Center

VERIFIER'S REPORT
 HYDROGRAPHIC SURVEY, H - 9239

INSTRUCTIONS - This form serves to identify items of a check list in verification together with items which are separately reported to the Reviewer. The form is not to be forwarded to the Reviewer. A report, which is prepared for the Reviewer, should identify items by number and letter and will be filed in the Descriptive Report until the survey is reviewed.

CL - Check List Items: should be checked as having been completed during the verification processes.

R - Report Item: This column refers to those items reported to the reviewer and is used to indicate the items discussed.

Part I - DESCRIPTIVE REPORT	CL	R	Part III - JUNCTIONS (Continued)	CL	R	
<p>Note: The verifier should first read the Descriptive Report for general information and problems.</p> <p>1. The Descriptive Report was consulted, paragraphs checked if found satisfactory, and notations were made in soft black pencil regarding action taken. Remarks Required: -- None</p>	X		<p>10. Junctions with contemporary surveys were satisfactory except as follows: Remarks Required: -- Consider conditions after adjustments have been made; note adjustments made. Make special notes of Butt junctions and areas which are SUPERSEDED.</p>		X	
<p>Soundings originating with the survey and mentioned in the Descriptive Report have been verified and checked in soft black pencil, including latitude and longitude, together with position identification. Remarks Required: -- None</p>	X		<p>Part IV - VOLUMES</p> <p>11. All items affecting the plotting of the survey which are entered in the remarks columns of the sounding records were noted and check marked. In all cases appropriate action was taken and exceptions noted in the volumes. Remarks Required: -- None</p>	X		
<p>3. All reference to survey sheets mentioned in the Descriptive Report should include registry number and year. Remarks Required: -- None</p>	X			<p>12. Condition of sounding records was satisfactory except as follows: Remarks Required: -- Mention deficiencies in completeness of notes or actions for the following: (a) rocks (b) line turns (c) position values of beginning and ending of lines (d) bar check or velocity correctors (e) time recording (f) notes or markings on fathograms (g) was reduction of soundings accurately done? (h) was scanning accurate? (i) were peaks at uneven intervals missed? (j) were stamps completed? (k) references to adjacent features</p>		
<p>Part II - SHORELINE AND SIGNALS</p> <p>4. Source of shoreline signals Remarks Required: -- List all surveys a. Give earliest and latest dates of photographs b. Field inspection date c. Field Edit date d. Reviewed-Unreviewed</p>		X	<p>Part V - PROTRACTING</p> <p>13. All positions verified instrumentally were check marked in color in the sounding records, and verifier initialed the processing stamp. Remarks Required: -- None</p>			
<p>The transfer of contemporary topographic information was carefully examined and reconciled with the hydrography. Remarks Required: -- Discuss remaining differences.</p>	X			<p>14. The protracting and plotting of all unsatisfactory crossings were verified. Remarks Required: -- None</p>	X	
<p>6. The plotting of all triangulation stations, topographic stations and hydrographic signals has been checked and noted in processing stamp No. 42 on the smooth sheet. Remarks Required: -- None</p>	X			<p>15. All detached positions locating critical soundings, rocks, buoys, breakers, obstructions, kelp, etc., were verified and the position numbers are legible. Remarks Required: -- None</p>	X	
<p>7. Objects on which signals are located and which fall outside of the high-water line have been described on the sheet. Remarks Required: -- List those signals still unidentified.</p>	X					
<p>Part III - JUNCTIONS</p> <p>Note: Make a cursory comparison preliminary to making soundings in area of overlap.</p> <p>8. All junctions of contemporary or overlapping sheets were transferred in colored ink and overlapping curves were made identical. Remarks Required: -- None</p>	X					
<p>9. The notation in slanted lettering "JOINS H---- (19)" was added in colored ink for all verified contemporary adjoining or overlapping sheets. Those not verified are shown in pencil. Remarks Required: -- None</p>	X					

Part V - PROTRACTING (Continued)	CL	R	Part VIII - AIDS TO NAVIGATION	CL	R
16. The protracting was satisfactory except as follows: Remarks Required: -- Refers to protracting in general except for specific faults repeated often, or faults in control information, which required considerable replotting or adjustments.	X		26. All fixed aids located together with those on the contemporary topographic sheets, have been shown on the survey. Remarks Required: -- Conflicts of any nature listed.	X	
17. The protractor has been checked within the last three months. Remarks Required: -- Date of check, type of protractor and number.	X		27. All floating aids listed in the Descriptive Report should be verified and checked in soft black pencil, including latitude and longitude and position identification. Remarks Required: -- None	X	
Part VI - SOUNDINGS			Part IX - BOAT SHEET		
18. All soundings are clear and legible, and critical soundings are a little larger than adjacent soundings. Remarks Required: -- None	X		28. The boat sheet was constantly compared with the smooth sheet with reference to notes, position of sounding lines and supplemental information. Remarks Required: -- None	X	
19. Sounding line crossings were satisfactory except as follows: Remarks Required: -- Discuss adjustments.	X		29. Heights of rocks awash were correctly reduced and compared with topographic information. Remarks Required: -- Note excessive conflicts with topographic information.	X	
20. The spacing of soundings as recorded in the records was closely followed; Remarks Required: -- None	X		Part X - GENERAL		
21. The scanning, reduction, spacing, plotting of questionable soundings have been verified. Remarks Required: -- None	X		30. All information on the sheet is shown in accordance with figures 82 and 83 in the Hydrographic Manual (Pub. 20-2). Remarks Required: -- None	X	
22. The smooth plotting of soundings was satisfactory except as follows: Remarks Required: -- Refer to legibility, errors in spacing, and errors in numbers - but not to errors in scanning.	X		31. Unnecessary pencil notes have been removed from the sheet. Remarks Required: -- None	X	
Part VII - CURVES			32. Degree, minute values and symbols have been checked; also electronic distance arcs have been properly identified and checked on the smooth sheet. Remarks Required: -- None	X	
23. The depth curves have been inspected before inking. Remarks Required: -- By whom was the penciled curves inspected.		X	33. The bottom characteristics are adequately shown. Remarks Required: -- None	X	
24. The low-water line and delineation of shoal areas have been properly shown in accordance with the following: a. From T-Sheet in dotted black lines b. From soundings in orange c. Approximate position of sketched curve is dashed orange d. Approximate position of shoal area not sounded in black dashed Remarks Required: -- None	X		Part XI - NOTES TO THE REVIEWER		
25. Depth curves were satisfactory except as follows: (This statement should not refer to the manner in which the curves were drawn). Remarks Required: -- Indicate areas where curves could not be drawn completely because of lack of soundings. For some inshore areas a general statement is sufficient.	X		34. Unresolved discrepancies and questionable soundings.	X	
			35. Notation of discrepancies with photogrammetric survey inserted in report of unreviewed photogrammetric survey or on copy.	X	
			36. Supplemental information.		X

VERIFIER'S REPORT

H-9239

DA=10-12-71

This sheet was constructed and plotted at Pacific Marine Center, Seattle, Washington. Information relating to this will be noted under the heading by the number and letter as on the Verifier's Report, C&GS Form 946A.

PART II SHORELINE AND SIGNALS

4. The shoreline was transferred from Class I Manuscripts scale 1:10,000, TP00208 and TP00209. *The following reviewed shoreline manuscripts were applied to H-9239 (1971) and reflect the correct changes made to the shoreline and offshore features TP-00208 (1971/75) and TP-00209 (1971/75).*

PART III JUNCTIONS

This survey junction with H-9240, 1971, scale 1:2500, in Salmon Harbor: Agreement was good. Curves were left in pencil due to the difference in Scale.

PART VII CURVES

23. Penciled curves were inspected by Clarence R. Lehman, Cartographic Technician.

PART XI NOTES TO THE REVIEWER

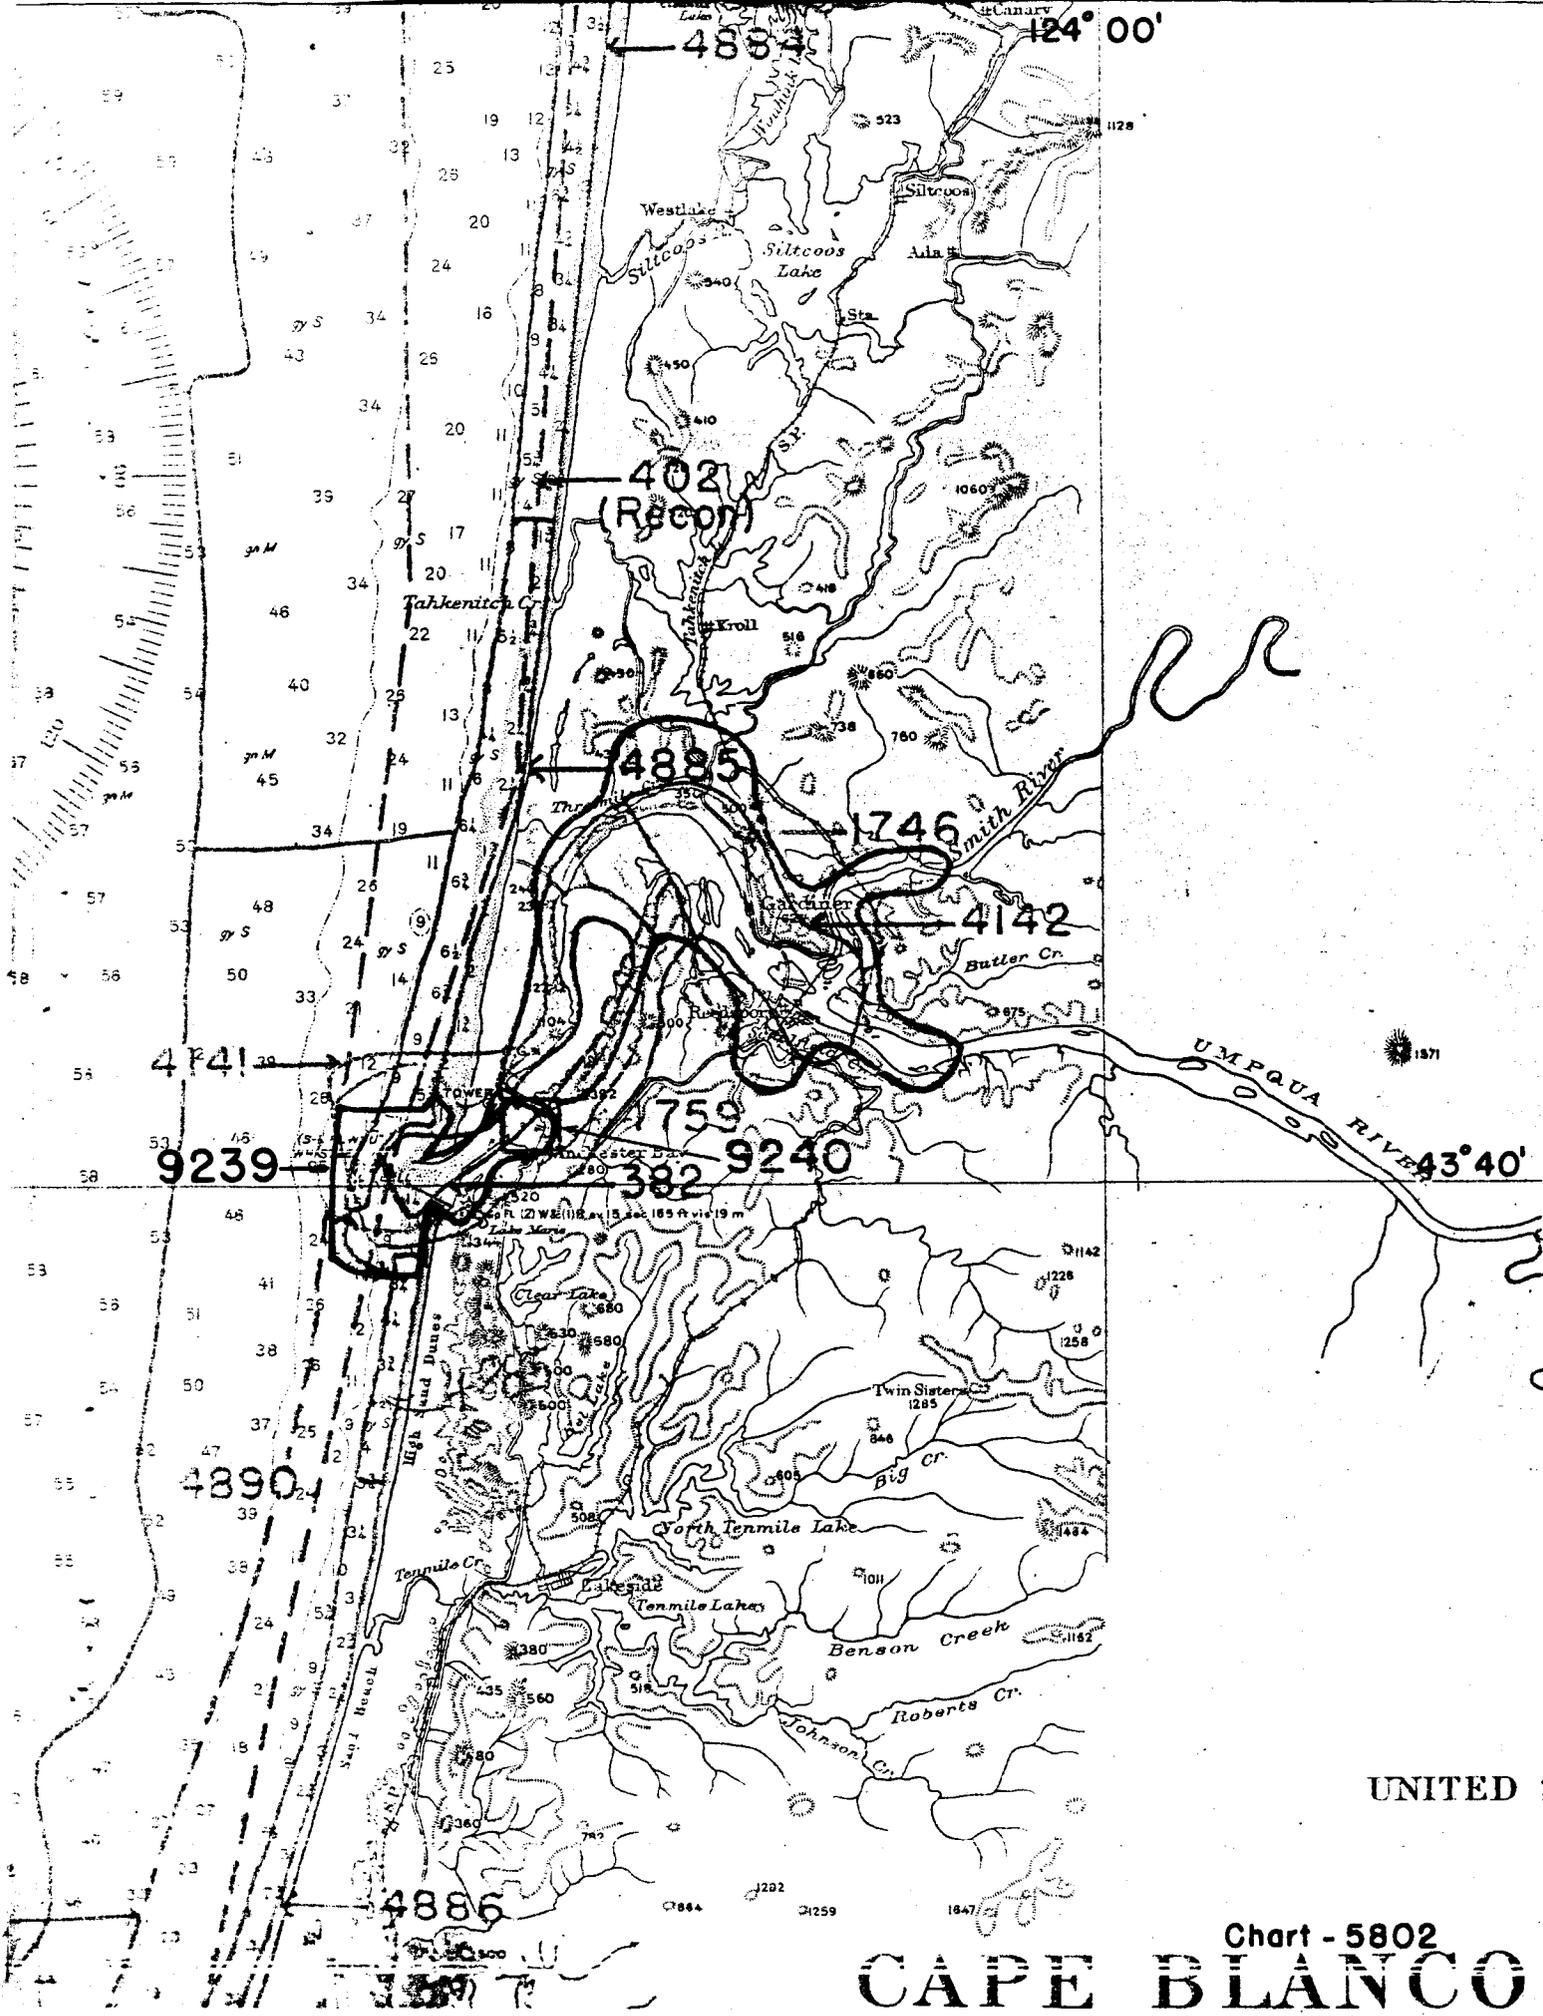

36. The current station displayed on the boat sheet at latitude $43^{\circ}40'018''$, and longitude $124^{\circ}12'321''$ was not transferred to the smooth sheet because of a critical sounding.

This survey is considered adequate to supersede prior surveys of the area.

Respectfully submitted,

Robert Montemayor
