

The following changes were made during office processing.

- a. Projection parameters were changed to center the hydrography on the smooth sheet and to change the projection to polyconic.
- b. Tide level reducers are from observed tides, see attached Form 712.
- c. Velocity correctors were changed after the velocity curves were re-drawn and scaled.
- d. Electronic control correctors (Mini-Ranger III) were meaned for the entire survey and applied to each corresponding transmitter/receiver.
