

This survey was conducted using predicted tides in the off-line processing. These tides were obtained using tide datum from Boston, Massachusetts (844-3970), and Nantucket, Massachusetts (844-3970). Tide stations were installed by MT MITCHELL personnel at Marconi State Seashore Headquarters, Massachusetts (844-6813), and Nauset Beach, Massachusetts (844-7481). These gages were operated and monitored throughout the survey. See the Field Tide Note included in Appendix B.
