

The final field sheet was plotted using unverified actual tide heights reduced to Mean Lower Low Water. Heights were obtained from Station No. 872-9679, Santa Rosa Sound, East End (Navarre Beach Bridge). Some portions of the rough field sheet were plotted using predicted tides corrected from the Pensacola tide station (No. 872-9840) to expedite processing.

Smooth tides were requested from the Sea and Lake Levels Branch, N/OMA12, in a letter dated May 7, 1986.
