

Predicted tide corrections were applied to the soundings plotted on the field sheets for this survey. The tide correctors used were from the 1986 West Coast of North and South America Tide Tables. Tide correctors use Kodiak, Alaska as the reference station using a height correction range ratio of "x1.32", a time correction of plus 0 hours 25 minutes at high water and plus 0 hours 40 minutes at low water. For further information, refer to the "Field Tide Note" in the separates following the Descriptive Report text.
