

Predicted tide correctors were applied to the soundings plotted on the final field sheets for this survey. The tide correctors used were from the Tide Tables 1987, West Coast of North and South America. Tide correctors use Juneau, Alaska, as the reference station using a height correction range ratio of "x0.96" and no time correction. For further information, refer to ~~Appendix H~~, Field Tide Note. (Filed with the hydrographic data.) ✓
