

Tidal zoning and correctors applicable to predicted tides for the Juneau, Alaska tide station (945-2210) were provided on the chart accompanying the Project Instructions, and are shown below.

Tide Correctors

<u>Applicable Area</u>	<u>Time Correction</u>		<u>Height Ratio</u>
	<u>High Water</u>	<u>Low Water</u>	
East of line between Cape Fanshaw and 57°03.0'N, 133°40.0'W	- 15 min	-10 min	x0.91
West of line noted above <i>(beyond sheet's limits)</i>	- 17 min	- 14 min	x0.87

Although two zones encompass the survey area, only the correctors from the ^{WESTERN} zone were applied to all soundings to aid in the logistics of acquiring and processing data. A printout of the predicted tide tapes is included with the survey data.

One tide station was established at Turnabout Island (945-1655) and maintained by RAINIER personnel. The field tide records and Field Tide Note for both stations have been forwarded to N/OMA121 in accordance with Hydrographic Survey Guideline #50 and PMC OPORDER. A request for approved tides has been forwarded to N/OMA121 and a copy is included with ~~this report~~ *the survey data.*
