

The final field sheet was plotted using predicted tides determined from the Willets Point, New York permanent tide station using time and height correctors listed the 1990 tide tables as stated in the Project Instructions.

Actual tide heights were requested from the Sea and Lake Levels Branch, N/OMA12, in a letter dated August 27, 1990. A copy of the letter is included in the appendices of this report.*
Approved tides and zoning were applied during office processing.
