

The final field sheets and rough sheets were plotted with predicted tides using the reference station and correctors designated in the project instructions. Approved tides were requested from the Sea and Lake Levels Branch, N/OMA1212, in a letter dated February 4, 1991. Copies of the field tide level note, request for approved tides, and HDAPS tide tables are included with the separates. *

Survey records were scanned by AHP-2 employees. Significant peaks and deeps which occurred between selected soundings, missed depths, incorrectly digitized soundings, and the effects of sea and swell action were corrected while scanning the echograms.
