

Tide Correctors

The Final Field Sheet was plotted using predicted tides based on San Francisco, California. Two tidal corrector zones from the Tide Zone Chart are within this survey's limits. Only correctors from Antioch, California (+4.0 hr HW, +4.45 hr LW, x 0.68 height ratio) were applied to all sounding data. *See Evaluation Report, section 1*

Approved water levels were requested from the Sea and Lake Levels Branch, N/OMA12, in a letter dated September 30, 1991. A copy of this letter is included in Appendix V*(Tides and Water Levels).
