

Tidal datum for project OPR-K220-WH was mean lower low water. Predicted tides from NOAA Tide Tables, Galveston, Texas (station number 877-1450) were used as a reference for this project.

Time and height correctors for the project were as follows: *APPROVED TIDES WERE APPLIED DURING OFFICE PROCESSING.*

	<u>Time Correction:</u>	<u>Height Ratio:</u>
High Water:	-1 hr 30 min	x1.28
Low Water:	-1 hr 30 min	x1.28

The operating tide stations at Corpus Christi, Texas (877-5870) and Port Isabel, Texas (877-9770) will be used as control for datum determination. Mr. Larry Nieson of the Atlantic Operations Group (N/OMA1213) confirmed the proper operation of the stations during the survey.
