

G.8 The tidal datum used for the survey was Mean Lower Low Water (MLLW). During post-processing, tidal data from the Sabine Pass offshore tidal station (877-1081) were used with correction offsets for tide zones 303 and 308. The tidal zone, stations, and offsets used during post-processing are given in the table below. *APPROVED TIDES AND ZONES WERE APPLIED DURING FIELD PROCESSING*

Tidal Zone	Tide Station	Time Correction			Height Correction
		HW	LW	Ave	
G303	877-1081	+12	-18	-6	0.75
G308	877-1081	+6	-18	-6	0.83
