

target distance offset.

**G.8** The tidal datum used for the survey was Mean Lower Low Water (MLLW). During post-processing, tidal data from the Sabine Pass offshore tidal station (877-1081) were used with correction offsets for tide zones 308 and 309. The tidal zone, stations, and offsets used during post-processing are given in the table below.

Tidal Zone	Tide Station	Time Correction			Height Correction
		HW	LW	Ave	
G308	877-1081	+6	-18	-6	0.83
G309	877-1081	-6	-12	-12	0.91

*VERIFIED TIDES AND ZONES FROM NOS-COOPS WEB SITE  
HAVE BEEN APPLIED TO THE SURVEY DATA.*
