JOA assembled tidal data for a twenty-four hour period UTC (Alaska Daylight Time to UTC was +8 hours) and emailed these data to the R/V Ocean Guardian at the end of every Julian Day. A cumulative file for the gauge was updated each day by appending the new data.

On October 10, 2005, JOA issued verified tidal data and final zoning for OPR-P182-KR-05. The tidal zoning was modified by JOA, providing a simpler zoning scheme from those issued in the Statement of Work (for additional information refer to JOA's Final Technical Report).¹¹ From October 10, 2005 to November 5, 2005 all sounding data were re-merged using CARIS HIPS and SIPS tide routine. Verified tidal data were used for the Preliminary Smooth Sheet.

Refer to the Vertical and Horizontal Control Report for additional tidal information and station descriptions.
