HYDROGRAPHIC SURVEY H11600

Scale of Survey: 1:20,000

Year of Survey: 2006

NOAA Ship THOMAS JEFFERSON  
CDR Raymond C. Slagle, Commanding

## A. AREA SURVEYED

This hydrographic survey was conducted in accordance with Hydrographic Survey Letter Instructions for project OPR-B310-TJ-06, New York Harbor, New York. The original instructions are dated July 6, 2006\*.

This Descriptive Report pertains to sheet "A" of project OPR-B310-TJ-06, which includes New York Harbor. The assigned registry number for this sheet is H11600, as prescribed in the Letter Instructions\*.

The purpose of the project is to provide accurate depths and object detection in the New York Harbor and its approaches to support safe and efficient marine transportation in the region. Most of the survey area in the project area is pre-1982 and parts of the project area have not been surveyed since 1927. Containerized cargo volumes in the Port of New York and New Jersey rose 7.6% in 2005 to a record high and 5,322 ships called on the port in 2005. The dollar value of the cargo moving through the port on those ships exceeded \$132 billion in 2005.

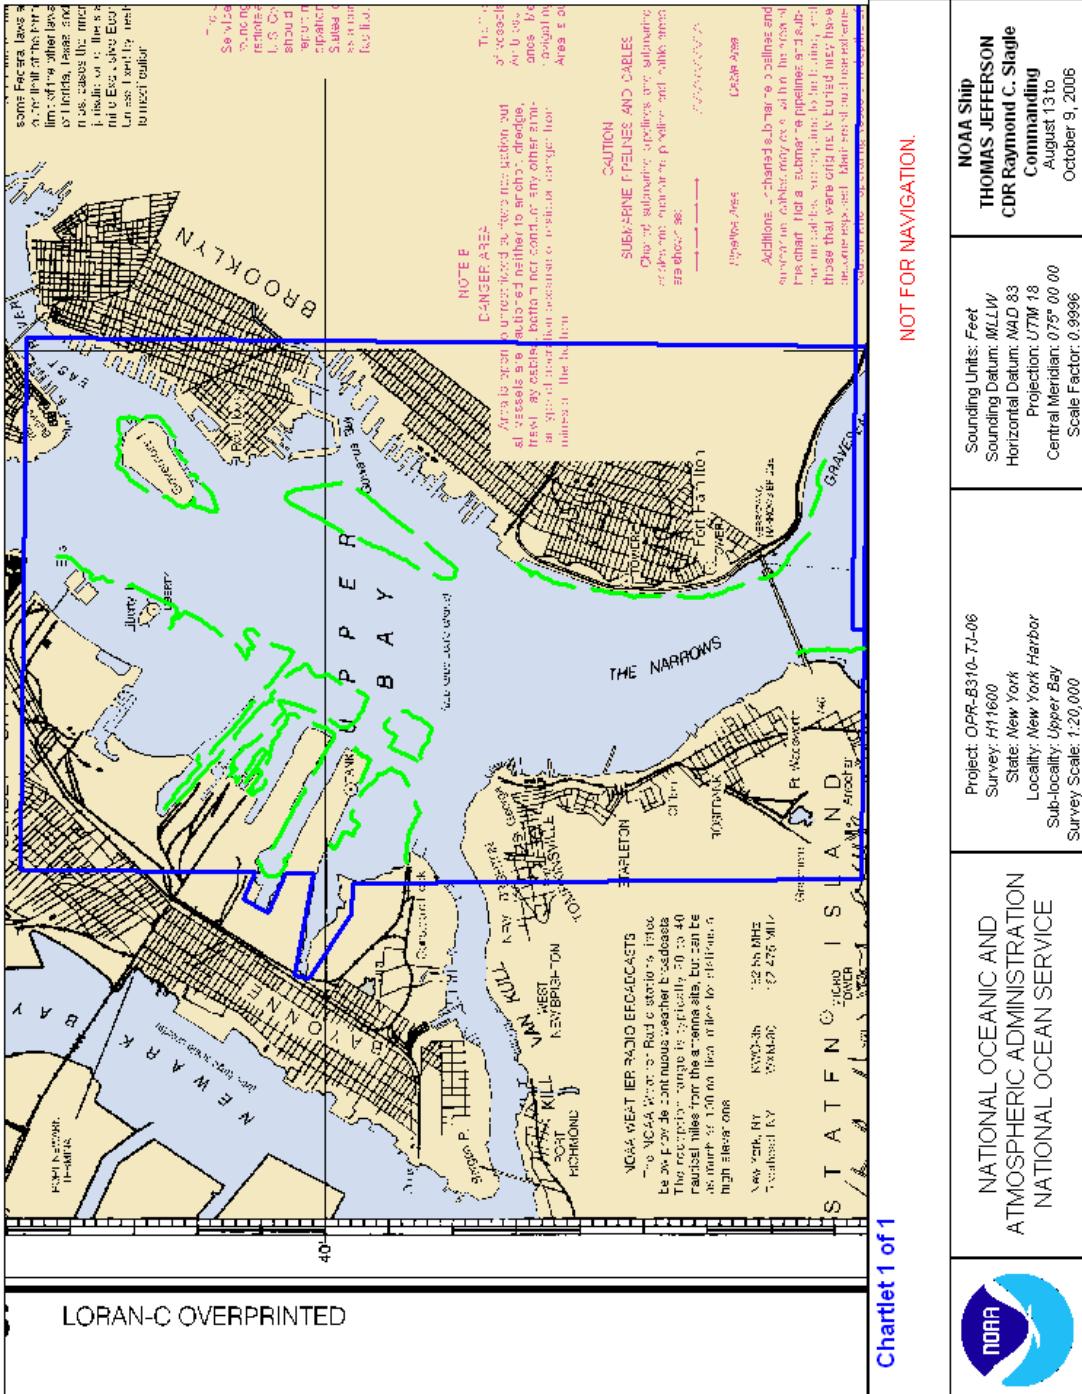

The Hydrographer set the inshore limit for survey at the 18-foot curve, except for instances where specific requests were made by various New York Harbor maritime organizations (i.e. Coast Guard Sector NY and NY Fireboat "FIREFIGHTER"). Additionally, any areas inside the sheet limits with no charted sounding data (mostly in the vicinity of piers) were not surveyed, with the exception of a specific request south of the Stapleton Pier. The Hydrographer recommends forwarding investigation of these unsurveyed areas to a Navigation Response Team.

\* *Included with original field submission.*

**Statistics**

- Lineal nautical miles of single beam only sounding lines – mainscheme only – 0
- Lineal nautical miles of multibeam only sounding lines – mainscheme only – 732.91
- Lineal nautical miles of side scan sonar only lines – mainscheme only – 295.83
- Lineal nautical miles of any combination of the above techniques (specify methods used) – 0
- Lineal nautical miles of crosslines – 35.08
- Lineal nautical miles of developments – 0.84
- Lineal nautical miles of shoreline/nearshore investigation – 0
- Specific dates of data acquisition – (August 13-18, 20-31; September 1, 15, and 18; October 9)
- Number of bottom samples collected – 0
- Number of items investigated either as a new development or from AWOIS – 33
- Number of square nautical miles – 12.77
- Number of items investigated that required additional time/effort in the field beyond the above survey operations – 0

The complete survey limits are shown in the chartlet below:

**B.**

## DATA ACQUISITION AND PROCESSING

### EQUIPMENT

Data were acquired by Hydrographic Survey Launches 3101 and 3102. Launches 3101 and 3102 are 9.5 meter Jensen aluminum vessels with transducer drafts of 0.8 meters.

Launch 3101 acquired shallow-water multibeam (SWMB) data with a Reson Seabat 8125 multibeam echosounder system. All positioning and attitude were determined with a TSS POS/MV 320 (version 4) GPS-aided internal navigation system.

Launch 3102 acquired shallow-water multibeam (SWMB) and side scan sonar data with a Reson Seabat 8101 multibeam echosounder system and Klein 5000 side scan sonar. All positioning and attitude were determined with a TSS POS/MV 320 (version 3) GPS-aided internal navigation system.

Refer to the Data Acquisition and Processing Report\* (DAPR) dated 1 September 2006 for detailed equipment and vessel configuration information.

### QUALITY CONTROL

#### Side Scan Sonar Quality Control

Daily confidence checks were made by observing the outer ranges of the side scan sonar images. A good check consisted of distinguishing contacts or sand waves across the entire range of the side scan trace. No unusual problems were encountered. **Concur.**

#### Shallow Water Multibeam Quality Control

Precise timing latencies occurred on DN's 228, 230, 232, 233, 234, 235, and 261 in the Reson 8125 data. This dynamic latency was corrected appropriately in the CARIS hvf for Launch 3101 and as of the writing of this report was due to unknown causes. For more detailed information see section D.3.1 of the 2006 DAPR\*.

The starboard outer beams (90-101) from the Reson 8101 MBES did not compare well with other MBES data. Data were closely examined and compared with surrounding data and the resulting BASE surfaces. Any MBES soundings found to adversely affect the surfaces or be unrepresentative of the actual bottom (outside the IHO Order 1 error specifications) were rejected. The Reson 8101 is scheduled to be calibrated during the 2006-2007 Winter Import.

**Concur. No systematic evidence of problem evident in field-submitted surfaces.**

\* **Included with original field submission.**

## Crosslines

A total of 35.08 linear nautical miles (lnm) of cross lines were run, equivalent to 4.9% of the 732.19 linear nautical miles of main scheme data. Caris HIPS 6.0 Crossline-to-BASE Grid comparisons were performed to test if the crosslines compared to the BASE Surfaces met IHO Order I specification. The surfaces meet IHO Order I specifications 97.6% of the time. QC checks in the deeper sections of the sheet (mostly in the southern portion) show less than 95% confidence of IHO Order 1 in the starboard outer beams. This may be attributed to the Reson 8101 issue described previously. Results of all QC tests are included in Separate IV\*. **Concur.**

## Junctions

Hydrographic survey H11400 was conducted by NRT5 in 2006. This survey overlaps the current survey in the lower southeast corner. The difference in the soundings between the two surveys ranges from 1 to 3 feet. **Concur.**

Hydrographic survey H11601 was conducted by NOAA Ship THOMAS JEFFERSON in 2006. This survey overlaps the current survey in the lower southwest corner. Soundings between H11600 and H11601 compare within 1 foot. **Concur.**

Hydrographic survey H11353 was conducted by NOAA Ship THOMAS JEFFERSON in 2004. This survey overlaps the current survey in the upper northeast corner. Most of the soundings agree within 1 foot, except for a few discrete areas with differences between 1 to 2 feet. **Concur.**

Hydrographic survey H11395 was conducted by NRT5 in 2006. This survey overlaps the current survey in the upper northwest corner. The two surveys compare within 1 to 2 feet. **Concur.**

## CORRECTIONS TO ECHO SOUNDING

All methods or instruments used were as described in the project DAPR\*. A table detailing all sound velocity casts is located in Separate III\*. **Do not concur. Separates III contains only the Hydrographic Letter of Instructions.**

## DATA PROCESSING

Thirty - Seven CUBE surfaces cover the entire survey area. These were created with a resolution of 1 meter. One combined surface was created with a resolution of 2 meters. Two side scan mosaics were created. One for the 100% and another for the 200%. Both of these have a resolution of 1 meter. **Concur.**

\* **Included with original field submission.**

The following values were used for computing TPE.

Vessel	Tide Values		Sound Speed Values	
	Measured	Zoning	Measured	Surface
3101	0	0.18	0.05	0.3
3102	0	0.18	0.05	0

## C. VERTICAL AND HORIZONTAL CONTROL

### VERTICAL CONTROL

The tidal datum for this project is Mean Lower Low Water (MLLW). The operating tide stations at The Battery, NY (851-8750) and Sandy Hook, NJ (853-1680) served as controls for datum determination. Tidal zoning for this survey is consistent with the Letter Instructions. The zones used for this survey are as follows:

STATION	CORRECTOR (min)	RATIO	REFERENCE
NY3	-30	x1.04	851-8750
NY18	-18	x1.03	851-8750
NY19	-12	x1.03	851-8750
NY20	-6	x1.04	851-8750
NY21	0	x1.00	851-8750

A Request for Approved Tides letter was sent to N/OPS1 on September 22, 2006 (Appendix IV). Verified tides from the N/OPS1 CO-OPS website were downloaded on September 20, 2006 and October 18, 2006 and applied to all sounding data. Final tide zoning was received on February 21, 2007. **Concur.**

### HORIZONTAL CONTROL

The horizontal datum used for this survey is the North American Datum of 1983 (NAD 83), projected using UTM zone 18.

Sounding positional control was determined using the Global Positioning System (GPS) corrected by U.S. Coast Guard differential GPS (DGPS) beacon stations. The primary and only DGPS beacon used for this survey was Sandy Hook, NJ (286). No horizontal control stations were established for this survey.

Horizontal dilution of precision (HDOP) was monitored daily on both launches. That value did not exceed 2.5, and adequate satellite coverage was maintained throughout the survey period.

## D. RESULTS AND RECOMMENDATIONS

### CHART COMPARISON

There are ~~seven~~ four charts and ~~three~~ two ENCs affected by this survey:

**12334**, 18<sup>th</sup> edition, April 2004, scale 1:10,000  
**12333**, 34<sup>th</sup> edition, December 2005, scale 1:15,000  
**12402**, 10<sup>th</sup> edition, May 2006, scale 1:15,000  
~~**12337**, 23<sup>rd</sup> edition, October 2005, scale 1:20,000~~  
**12327**, 98<sup>th</sup> edition, September 2005, scale 1:40,000  
~~**12326**, 50<sup>th</sup> edition, May 2006, scale 1:80,000~~  
~~**12300**, 45<sup>th</sup> edition, March 2005, scale 1:400,000~~  
~~**US3NY01M** 8<sup>th</sup> edition June 2006, scale 1:400,000~~  
~~**US5NY19M** 3<sup>rd</sup> edition March 2006, scale 1:15,000~~  
~~**US2EC03M** 5<sup>th</sup> edition June 2006, scale 1:200,000~~

*The ENCs that encompass the area are US5NY1CM and US5NY1DM.*

### General Agreement with Charted soundings

The soundings were compared to those on charts 12335, 12334, and 12402. Most of the soundings have a difference of 1 to 2 feet. There are four areas that have significant shoaling. South of the Military Ocean Terminal there is a difference of up to 12 feet. The area around Stapleton Pier also has a difference of up to 12 feet. South of the 39<sup>th</sup> Street Pier there is a difference of up to 14 feet. North of Robbins Reef there is a difference of up to 6 feet. These areas are all described in Appendix \*I. *Concur.*

The soundings in Constable Hook Reach agree with the controlling depths. *Concur.*

### AWOIS Items and Significant Contacts

Fifty - seven AWOIS items were assigned to this project. Of these, twenty - eight were fully investigated and 5 were information only items. See Appendix II\* for the applicable feature reports. *Concur with clarification. Sixty-four AWOIS items are addressed in Pydro, seven of which were not assigned to the field unit.*

### Dangers to Navigation

A total of forty - four Dangers to Navigation (DTONs) were reported by the Hydrographer to N/CS26 (MCD). For the complete DTON reports (sent August 14, August 26, September 25, October 12, and October 16, 2006), see Appendix I\*. *Concur.*

*\* Included with original field submission.*

## Charted Features

All charted point features are addressed in the Survey Feature Reports section (Appendix II\*). **Concur.**

## ADDITIONAL RESULTS

### Aids to Navigation and Other Detached Positions

All of the aids to navigation are correctly charted except G C "9", R N "8", G "27", and W Or C. Buoy G C "9" is located approximately 72 meters east of its charted position. Buoy R N "8" is located approximately 55 meters south of its charted position. Buoy G "27" is located approximately 52 meters south of its charted position. No block and chain was seen for buoy W Or C.

US Coast Guard Sector New York was notified of these buoys off position. A DTON report for these was not submitted. The Coast Guard will investigate or reposition these. Correspondence can be found in Appendix V\*. **Concur.**

Detached positions were taken by a new pier and some charted ruins. The ruins are located on the west side of the Anchorage Channel. A new pier was built over ruins in the vicinity of Owls Head Park. **Concur.**

### Bridges and Overhead Cables

The only bridge within the survey limits is the Verrazano - Narrows Bridge. No shoreline verification was conducted. Imagery and bathymetry acquired over the bridge supports show it is charted properly. No overhead cables were observed over this survey area. **Concur.**

### Ferry Routes

The New York City Department of Transportation ferries follow a set route from St. George on Staten Island north up the northern portion of the Anchorage Channel to The Battery in southern Manhattan. Seastreak ferries follow three set routes. These go from: (1) Atlantic Highlands in Monmouth County, NJ, to Pier 11 at Wall Street and East 34<sup>th</sup> Street, Manhattan; (2) Highlands in Monmouth County, NJ, to Pier 11 at Wall Street and East 34<sup>th</sup> Street, Manhattan; and (3) Highlands, NJ, to Shea Stadium, Queens. There are many other public and private ferries that transit the Manhattan/Hudson River/East River areas. Sightseeing boats transit between Ellis Island, Liberty Island, and Manhattan. **Concur.**

\* *Included with original field submission.*

**Submarine Cables and Pipelines**

There are two visible pipelines within the survey limits. One extends from Red Hook to Governors Island. The other is visible east of Robbins Reef. There are seven other charted pipelines which are not visible. Retain all pipelines as charted. ***Concur.***

**E. APPROVAL SHEET**

**OPR-B310-TJ-06  
New York Harbor  
New York**

**Upper Bay  
Survey Registry No. H11600**

Field operations for this basic hydrographic survey were conducted under my daily supervision with frequent checks of progress and adequacy. All field sheets, this Descriptive Report, and all accompanying records and data are approved.

This survey is adequate to supersede all prior surveys in common areas, and for application to the relevant NOS nautical charts.

Also submitted in association with this descriptive report have been the following reports:

- 2006 Hydrographic Systems Readiness Review report (submitted 09 May 2006)
- OPR-B310-TJ-06 Horizontal and Vertical Control Report (submitted 04 December 2006)
- 2006 Data Acquisition and Processing Report (submitted 06 October 2006)

Respectfully,

Submitted:

  
ST Kimberly A. Glomb  
Sheet Manager

Approved and Forwarded:

## **1 - DR\_DToN**

## 1.1) DTON1 Wreck - 1088/20

### DANGER TO NAVIGATION

#### Survey Summary

**Survey Position:** 40° 37' 40.7" N, 074° 02' 36.0" W  
**Least Depth:** 8.69 m (= 28.50 ft = 4.751 fm = 4 fm 4.50 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.981$  m ; TVU (TPEv)  $\pm 0.369$  m  
**Timestamp:** 2006-226.13:52:51.709 (08/14/2006)  
**Survey Line:** h11600 / tj\_3102\_reson8101 / 2006\_226 / 103\_1350  
**Profile/Beam:** 1088/20  
**Charts Affected:** 12334\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Uncharted dangerous wreck acquired with Reson 8101 MBES and Klein 5000 SSS. Wreck appears to have an elongated mast and deep scour south of the hull. Wreck deemed a Danger to Navigation.

#### Hydrographer Recommendations

Chart dangerous obstruction with least depth 4.67 meters (15.34 feet).

**Cartographically-Rounded Depth (Affected Charts):**

15ft (12334\_1, 12335\_1, 12337\_1, 12327\_1, 12326\_1, 12363\_1)

2 ½fm (12300\_1, 13006\_1, 13003\_1, 14500\_1)

4.7m (5161\_1)

#### S-57 Data

**Geo object 1:** Obstruction (OBSTRN)

**Attributes:** QUASOU - 6:least depth known

TECSOU - 3:found by multi-beam

VALSOU - 4.675 m

VERDAT - 12:Mean lower low water

WATLEV - 3:always under water/submerged

### **Office Notes**

Concur with clarification. Obstrn is currently charted on the continual update raster as of 12/01/08.

## 1.19) DTON5 39P Shoal 720/123

### DANGER TO NAVIGATION

#### Survey Summary

**Survey Position:** 40° 39' 31.4" N, 074° 01' 01.2" W  
**Least Depth:** 5.90 m (= 19.36 ft = 3.227 fm = 3 fm 1.36 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.980$  m ; TVU (TPEv)  $\pm 0.367$  m  
**Timestamp:** 2006-239.17:35:43.336 (08/27/2006)  
**Survey Line:** h11600 / tj\_3101\_reson8125 / 2006\_239 / 317\_1734  
**Profile/Beam:** 720/123  
**Charts Affected:** 12334\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

Sounding data (Reson 8125 MBES) reveals this significantly shoal sounding over a charted sounding in the vicinity of the 39th Street Pier (Mitsui Terminal). Soundings corrected to MLLW with verified water levels and final tide zoning. Other data suggest significant shoaling in the surrounding area.

#### Feature Correlation

Address	Feature	Range	Azimuth	Status

#### Hydrographer Recommendations

Chart dangerous obstruction with least depth 9.25 meters (30.36 feet).

#### Cartographically-Rounded Depth (Affected Charts):

30ft (12334\_1, 12327\_1, 12326\_1)

5fm (12300\_1, 13006\_1, 13003\_1, 14500\_1)

9.3m (5161\_1)

## S-57 Data

**Geo object 1:** Obstruction (OBSTRN)

**Attributes:**

- QUASOU - 6:least depth known
- TECSOU - 3:found by multi-beam
- VALSOU - 9.254 m
- VERDAT - 12:Mean lower low water
- WATLEV - 3:always under water/submerged

## Office Notes

Concur with clarification. Obstrn is currently charted on the continual update raster as of 12/01/08.

## 1.41) DTON5 SP Shoal 205/46

### DANGER TO NAVIGATION

#### Survey Summary

**Survey Position:** 40° 37' 41.2" N, 074° 04' 11.3" W  
**Least Depth:** 8.22 m (= 26.96 ft = 4.493 fm = 4 fm 2.96 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.982$  m ; TVU (TPEv)  $\pm 0.369$  m  
**Timestamp:** 2006-258.15:20:42.883 (09/15/2006)  
**Survey Line:** h11600 / tj\_3102\_reson8101 / 2006\_258 / 214\_1520  
**Profile/Beam:** 205/46  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

Sounding data (Reson 8101 MBES) reveals this significantly shoal sounding over a charted sounding in the vicinity of Military Ocean Terminal. Soundings corrected to MLLW with verified water levels and final tide zoning. Other data suggest significant shoaling in the surrounding area.

#### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_reson8101/2006_258/214_1520	205/46	0.00	000.0	Primary

#### Hydrographer Recommendations

Update charted sounding to 27 ft.

#### Cartographically-Rounded Depth (Affected Charts):

27ft (12334\_1, 12333\_1, 12327\_1, 12326\_1)  
 4 ½fm (12300\_1, 13006\_1, 13003\_1, 14500\_1)  
 8.2m (5161\_1)

#### S-57 Data

**Geo object 1:** Sounding (SOUNDG)  
**Attributes:** QUASOU - 6:least depth known  
 STATUS - 1:permanent  
 TECSOU - 3:found by multi-beam

VERDAT - 12:Mean lower low water

## **Office Notes**

Do not concur. Chart current survey soundings.

## **1 - DR\_AWOIS**

## 1.1) AWOIS #13408 Subm. Pile - 0001

### Primary Feature for AWOIS Item #13408

**Search Position:** 40° 40' 17.1" N, 074° 03' 50.1" W  
**Historical Depth:** [None]  
**Search Radius:** 50  
**Search Technique:** S2, SWMB, DI  
**Technique Notes:** SEARCH NOT REQUIRED IN DEPTHS SHOALER THAN 4 METERS

#### History Notes:

H09815/80 -- SUBMERGED PILE NOW CHARTED IN POSITION: 40°40'17.14" N 074°03'50.09" W (NAD 83).  
 UPDATED 12/7/2005 JCM

### Survey Summary

**Survey Position:** 40° 40' 16.3" N, 074° 03' 50.3" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-238.07:51:49 (08/26/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-233 / 147\_1350  
**Contact/Point:** 0001/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

AWOIS item #13408 acquired with 200% Klein 5000 side scan. The multibeam coverage did not reach it.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-233/147_1350	0001	0.00	000.0	Primary

## **S-57 Data**

[None]

## **Office Notes**

Concur. Retain as charted.

## 1.23) AWOIS #13410 - not investigated

### Primary Feature for AWOIS Item #13410

**Search Position:** 40° 36' 27.5" N, 074° 02' 07.3" W  
**Historical Depth:** [None]  
**Search Radius:** 50  
**Search Technique:** S2, SWMB, DI  
**Technique Notes:** SEARCH NOT REQUIRED IN DEPTHS SHOALER THAN 4 METERS

#### History Notes:

UNKNOWN SOURCE -- SUBMERGED DANGEROUS WRECK NOW CHARTED IN POSITION 40°36'27.52" N 074°02'07.27" W (NAD 83). UPDATED 12/7/2005 JCM

### Survey Summary

**Survey Position:** 40° 36' 27.5" N, 074° 02' 07.3" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-303.21:25:10 (10/30/2006)  
**GP Dataset:** ChartGPs - Digitized  
**GP No.:** 19  
**Charts Affected:** 12334\_1, 12402\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

AWOIS item #13410 was not investigated due to shallow depth.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
ChartGPs - Digitized	19	0.00	000.0	Primary
AWOIS_B310-TJ-06	AWOIS # 13410	0.59	170.7	Secondary (grouped)

### Hydrographer Recommendations

Retain charted wreck.

## **S-57 Data**

[None]

## **Office Notes**

Concur. Retain as charted.

## 1.24) AWOIS #13471 - retain as charted

### Primary Feature for AWOIS Item #13471

**Search Position:** 40° 42' 02.9" N, 074° 02' 45.0" W  
**Historical Depth:** [None]  
**Search Radius:** 0  
**Search Technique:** MB, S2  
**Technique Notes:** [None]

#### History Notes:

L-1266/74-- THERE IS A SUNKEN BARGE OR A COLLAPSED PIERHEAD SECTION AT THE EASTERN TIP OF THE SOUTH PIER OF THE LIBERTY YACHT CLUB, FOOT OF BURMA ROAD AND CAVEN PT. ROAD, JERSEY CITY, NJ. THIS OBSTRUCTION WAS MARKED BY A 2 INCH BY 4 INCH UPRIGHT SPAR AT THE OUTBOARD QUARTERS OF SAME. THE SPARS HAD A RED PENNANT ON THE TOP AND EXTENDED APPROXIMATELY SIX FEET ABOVE THE WATER SURFACE. UPDATED 2/23/2006 JCM.

### Survey Summary

**Survey Position:** 40° 42' 02.9" N, 074° 02' 45.0" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]

**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

AWOIS item #13534 was not investigated.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
ChartGPs - Digitized	36	0.00	000.0	Primary
AWOIS_B310-TJ-06	AWOIS # 13534	2.98	296.0	Secondary (grouped)

### Hydrographer Recommendations

Retain charted obstruction.

## **S-57 Data**

[None]

## **Office Notes**

Concur. Retain as charted.

## 1.41) AWOIS #2702 - not investigated

### Primary Feature for AWOIS Item #2702

**Search Position:** 40° 41' 57.1" N, 074° 01' 37.7" W  
**Historical Depth:** [None]  
**Search Radius:** 200  
**Search Technique:** SD, S2, SWMB, DI  
**Technique Notes:** [None]

#### History Notes:

H9815/80--OPR-B139-WH-80; SPIKE FOUND WITH 46 FT LD, 10-METER DEVELOPMENT ■  
FE232/80WD--OPR-B645-RU/HE-80; HUNG AT 44 FT., CLEARED TO 43 FT; NO DIVER  
■INVESTIGATION, FATHOGRAMS INDICATE OBSTR. MAY EXTEND ABOUT 6 FT OFF BOTTOM.

### Survey Summary

**Survey Position:** 40° 41' 57.1" N, 074° 01' 37.7" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-333.19:12:42 (11/29/2006)  
**GP Dataset:** ChartGPs - Digitized  
**GP No.:** 38  
**Charts Affected:** 12334\_1, 12335\_1, 12337\_1, 12327\_1, 12326\_1, 12363\_1, 12300\_1, 13006\_1, 5161\_1,  
13003\_1, 14500\_1

#### Remarks:

The AWOIS radius for item #2702 was not fully covered by survey H11600. H11395 is the junctioning survey for this item. The DR mentions that there were no AWOIS items in that survey.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
ChartGPs - Digitized	38	0.00	000.0	Primary
AWOIS_B310-TJ-06	AWOIS # 2702	1.54	346.4	Secondary (grouped)

## **Hydrographer Recommendations**

Retain charted 43 foot obstruction.

## **S-57 Data**

[None]

## **Office Notes**

Concur. Retain as charted.

## 1.42) AWOIS #9717 - not investigated

### Primary Feature for AWOIS Item #9717

**Search Position:** 40° 35' 39.0" N, 074° 02' 48.0" W  
**Historical Depth:** [None]  
**Search Radius:** 500  
**Search Technique:** SD, S2, MB  
**Technique Notes:** [None]

**History Notes:**

UNKNOWN SOURCE-- CHARTED SINCE 1941 AS WRECKAGE CLEARED TO 36 FEET. POSITION SCALED FROM CHART 12327 IN APPROX. LAT. 40-35-39N, LONG. 74-02-48W. (ENT 4/2/96, SJV)

### Survey Summary

**Survey Position:** 40° 35' 39.0" N, 074° 02' 48.0" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-334.18:29:26 (11/30/2006)  
**GP Dataset:** ChartGPs - Digitized  
**GP No.:** 39  
**Charts Affected:** 12402\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

The AWOIS radius for item #9717 was not fully covered by survey H11600. H11601 is the junctioning survey for this item. Nothing was found on H11600 that matches the AWOIS description of this item. H11601 found an obstruction within the search radius for this item.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
ChartGPs - Digitized	39	0.00	000.0	Primary
AWOIS_B310-TJ-06	AWOIS # 9717	0.84	349.9	Secondary (grouped)

### Hydrographer Recommendations

Use the charting recommendations of H11601.

## **S-57 Data**

[None]

## **Office Notes**

Defer to H116001 for charting recommendation.

### 1.43) AWOIS #13488 - retain as charted.

#### Primary Feature for AWOIS Item #13488

**Search Position:** 40° 39' 57.4" N, 074° 00' 23.5" W  
**Historical Depth:** [None]  
**Search Radius:** 200  
**Search Technique:** MB, S2  
**Technique Notes:** [None]

**History Notes:**

LNM 38/82, 3rd CGD -- PATCHOGUE OIL PIER IN POSITION APPROXIMATE: 40 39 57.00 N, 074 00 25.00 W (NAD 27) HAS BEEN KNOCKED DOWN. UNDERWATER DEBRIS EXISTS IN THE AREA. UPDATED 2/23/2006 JCM.

#### Survey Summary

**Survey Position:** 40° 39' 57.4" N, 074° 00' 23.5" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-334.18:44:18 (11/30/2006)  
**GP Dataset:** ChartGPs - Digitized  
**GP No.:** 40  
**Charts Affected:** 12334\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

AWOIS item #13488 is described as debris. Debris was acquired with 200% Klein 5000 side scan and 100% Reson 8125 multibeam. The entire radius for this item was not investigated. The debris in the area that was covered is not shoal enough when compared with surrounding bathymetry to be navigationally significant.

#### Feature Correlation

Address	Feature	Range	Azimuth	Status
ChartGPs - Digitized	40	0.00	000.0	Primary
AWOIS_B310-TJ-06	AWOIS # 13488	0.26	180.0	Secondary (grouped)

## **Hydrographer Recommendations**

Update the AWOIS database to reflect the current survey findings and forward the incomplete area of the AWOIS circle to NRT for complete investigation.

## **S-57 Data**

[None]

## **Office Notes**

Concur. Retain as charted.

## 1.44) AWOIS #10660 - uncharted disproval

### Primary Feature for AWOIS Item #10660

**Search Position:** 40° 40' 48.0" N, 074° 01' 18.0" W  
**Historical Depth:** [None]  
**Search Radius:** 200  
**Search Technique:** MB, S2  
**Technique Notes:** [None]

**History Notes:**

LNM7/1994--IST CGD, 2/16/94; THE 26-FOOT CENTER CONSOLE BOAT REPORTED IN BUTTERMILK CHANNEL REMAINS UNLOCATED. LAST KNOWN POSITION IS 40 40 48N, 74 01 18W NAD 83 . ENTERED 6/00 MCR■■■■■LNM 20/06 -- DELETE SYMBOL FOR WRECK (REP 1994).■ \*\*\*\*PERSONAL COMMUNICATION WITH JOHN TAVOLARO - John.F.Tavolaro@nan02.usace.army.mil- OF THE USACE REVEALED THAT THERE WAS NO INDICATION OF A WRECK ON CHANNEL CONDITION SURVEYS DONE BETWEEN APRIL 1999 AND FEBRUARY 2005. UPDATED 7/3/2006 JCM.

### Survey Summary

**Survey Position:** 40° 40' 48.0" N, 074° 01' 18.0" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-335.14:01:32 (12/01/2006)  
**GP Dataset:** ChartGPs - Digitized  
**GP No.:** 41  
**Charts Affected:** 12334\_1, 12335\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

The Current AWOIS description for item #10660 has this item being removed. Notice to Mariners dated 18 May 2006 shows DELETE symbol for wreck (rep 1994). This wreck no longer appears on chart 12334. No item matching the description exists in search radius after investigation with 200% SSS and 100% MBES.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
ChartGPs - Digitized	41	0.00	000.0	Primary
AWOIS_B310-TJ-06	AWOIS # 10660	0.77	172.7	Secondary (grouped)

## **Hydrographer Recommendations**

Remove AWOIS item #10660 from the database.

### **S-57 Data**

[None]

### **Office Notes**

Concur with clarification. Item is not currently charted. Retain as not charted.

## 1.45) AWOIS #10667 Obstruction - 35/206

### Primary Feature for AWOIS Item #10667

**Search Position:** 40° 42' 04.5" N, 074° 02' 07.5" W  
**Historical Depth:** [None]  
**Search Radius:** 50  
**Search Technique:** MB, S2  
**Technique Notes:** [None]

#### History Notes:

LNM47/74--10/30/75, 3RD CGD; TWO UNIDENTIFIED OBSTRUCTIONS HAVE BEEN REPORTED TO EXIST OFF ELLIS ISLAND, NY. ONE IS IN APPROX POSITION 40 42 04N, 074 02 09W NAD 27. SEE AWOIS 10668 FOR SECOND. ENTERED 6/00 MCR.

### Survey Summary

**Survey Position:** 40° 42' 03.1" N, 074° 02' 07.1" W  
**Least Depth:** 6.18 m (= 20.29 ft = 3.381 fm = 3 fm 2.29 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.980$  m ; TVU (TPEv)  $\pm 0.367$  m  
**Timestamp:** 2006-225.16:53:49.021 (08/13/2006)  
**Survey Line:** h11600 / tj\_3101\_reson8125 / 2006\_225 / 235\_1653  
**Profile/Beam:** 35/206  
**Charts Affected:** 12334\_1, 12335\_1, 12337\_1, 12327\_1, 12326\_1, 12363\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

AWOIS item #10667 acquired with Reson 8125 MBES and 200% Klein 5000 side scan. Soundings were corrected to MLLW with verified water levels and final tide zoning.

### Feature Correlation

Address	Feature	Range	Azimuth	Status

Concur. Move charted AWOIS item #13535 to current position with a least depth of 9.02 meters (29.58 feet).

## 1.47) AWOIS #13262/#10666 603/146

### Primary Feature for AWOIS Item #13262

**Search Position:** 40° 41' 26.5" N, 074° 01' 33.6" W  
**Historical Depth:** 10.36 m  
**Search Radius:** 50  
**Search Technique:** MB, S2  
**Technique Notes:** [None]

#### History Notes:

CL-54/03 -- S-B601-RU-02; FOUND WK AT 40/41/26.493N 74/01/33.576W WITH LEAST DEPTH OF 34 FT (ENT. 05/27/05, SME)

### Survey Summary

**Survey Position:** 40° 41' 26.5" N, 074° 01' 33.6" W  
**Least Depth:** 10.45 m (= 34.27 ft = 5.712 fm = 5 fm 4.27 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.980$  m ; TVU (TPEv)  $\pm 0.367$  m  
**Timestamp:** 2006-226.18:47:12.153 (08/14/2006)  
**Survey Line:** h11600 / tj\_3101\_reson8125 / 2006\_226 / 287\_1845  
**Profile/Beam:** 603/146  
**Charts Affected:** 12334\_1, 12335\_1, 12337\_1, 12327\_1, 12326\_1, 12363\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

AWOIS item #13262 acquired with Reson 8125 MBES and 200% Klein 5000 side scan. Soundings were corrected to MLLW with verified water levels and final tide zoning.

### Feature Correlation

**Contact/Point:** 0027/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Eight charted dolphins not seen in charted postions with 200% Klein 5000 side scan.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/175_1349	0027	0.00	000.0	Primary

### Hydrographer Recommendations

Remove all eight charted dolphins.

### S-57 Data

[None]

### Office Notes

Do not concur. Not enough evidence for removal. Retain as charted.

## 1.49) Dolphin 0028 - retain as charted

### Survey Summary

**Survey Position:** 40° 39' 23.1" N, 074° 05' 02.2" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-244.10:34:43 (09/01/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 175\_1349  
**Contact/Point:** 0028/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted dolphin not seen in charted position with 200% Klein 5000 side scan.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/175_1349	0028	0.00	000.0	Primary

### Hydrographer Recommendations

Remove charted dolphin.

### S-57 Data

[None]

### Office Notes

Do not concur. Not enough evidence to warrant removal. Retain as charted.

## 1.50) Ruins ruins 0002 - retain as charted

### Survey Summary

**Survey Position:** 40° 39' 51.6" N, 074° 00' 30.0" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]

**Remarks:**

Charted dolphin not seen with 200% Klein 5000 side scan.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/232_1813	0005	0.00	000.0	Primary

### Hydrographer Recommendations

Remove charted dolphin.

### S-57 Data

[None]

### Office Notes

Do not concur. Retain as charted.

### 1.53) Dolphin 0004 - retain as charted

#### Survey Summary

**Survey Position:** 40° 39' 52.7" N, 074° 00' 28.2" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-244.02:13:40 (09/01/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 232\_1813  
**Contact/Point:** 0004/1  
**Charts Affected:** 12334\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted dolphin acquired with 200% Klein 5000 side scan.

#### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/232_1813	0004	0.00	000.0	Primary

#### Hydrographer Recommendations

Retain charted dolphin.

#### S-57 Data

[None]

#### Office Notes

Concur.

**1.54) Ruins 0006 - retain as charted****Survey Summary**

**Hydrographer Recommendations**

Retain charted ruins.

**S-57 Data**

[None]

**Office Notes**

Concur.

**1.55) Ruins/pile 0002 - retain as charted****Survey Summary**

**Survey Position:** 40° 41' 14.8" N, 074° 04' 41.0" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-227.12:46:05 (08/15/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 234\_1610  
**Contact/Point:** 0002/1  
**Charts Affected:** 12334\_1, 12333\_1, 12337\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted ruins acquired with 200% Klein 5000 side scan. Charted pile not seen in charted position.

**Feature Correlation**

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/234_1610	0002	0.00	000.0	Primary

**Hydrographer Recommendations**

Retain charted ruins. Remove charted pile.

**S-57 Data**

[None]

**Office Notes**

Do not Concur. One sidescan line with distorted image due to being run in a turn does not conclusively disprove this particular item. Retain as charted.

## 1.56) Ruins 0014 - retain as charted

### Survey Summary

**Survey Position:** 40° 41' 00.9" N, 074° 04' 09.6" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-244.12:56:18 (09/01/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 234\_1610  
**Contact/Point:** 0014/1  
**Charts Affected:** 12334\_1, 12333\_1, 12337\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted ruins not seen in charted position with 200% Klein 5000 side scan.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/234_1610	0014	0.00	000.0	Primary

### Hydrographer Recommendations

Remove charted ruins up to side scan limts.

### S-57 Data

[None]

### Office Notes

Do not Concur. Outer range of one sidescan line. Not enough evidence for disproval.

**1.57) Piles 0015 - retain as charted****Survey Summary**

**Survey Position:** 40° 40' 59.1" N, 074° 04' 07.2" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-244.12:57:11 (09/01/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 234\_1610  
**Contact/Point:** 0015/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted piles not seen in charted position with 200% Klein 5000 side scan.

**Feature Correlation**

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/234_1610	0015	0.00	000.0	Primary

**Hydrographer Recommendations**

Remove charted piles.

**S-57 Data**

[None]

**Office Notes**

Do not Concur. Not enough evidence to support disapproval. There is debris in the area as well, on the charted "15".

**1.58) Pier ruins 0016 - retain as charted****Survey Summary**

**Survey Position:** 40° 41' 12.6" N, 074° 04' 36.9" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-297.12:50:58 (10/24/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 234\_1610  
**Contact/Point:** 0016/1  
**Charts Affected:** 12334\_1, 12333\_1, 12337\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted ruins acquired with 200% Klein 5000 side scan.

**Feature Correlation**

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/234_1610	0016	0.00	000.0	Primary
h11600/tj_3102_klein5000_sss100/2006-225/341_1559	0002	0.82	293.1	Secondary

**Hydrographer Recommendations**

Retain charted ruins.

**S-57 Data**

[None]

**Office Notes**

Concur.

## 1.59) Pile 0001 - Retain as charted

### Survey Summary

**Survey Position:** 40° 40' 08.1" N, 074° 04' 47.1" W

### Hydrographer Recommendations

Remove charted ruins up to side scan limits.

### S-57 Data

[None]

### Office Notes

Concur on this particular ruins designation. The adjacent ruins should be retained as charted.

**1.109) Pier ruins 0009****Survey Summary**

**Survey Position:** 40° 38' 52.6" N, 074° 04' 35.4" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-227.09:17:33 (08/15/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 345\_1319  
**Contact/Point:** 0009/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Charted ruins not seen in charted position with 200% Klein 5000 side scan.

**Feature Correlation**

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/345_1319	0009	0.00	000.0	Primary

**Hydrographer Recommendations**

Remove charted ruins up to side scan limit.

**S-57 Data**

[None]

**Office Notes**

Do not concur. Although not as debris filled as other ruins, there are still ruins present and thus should be retained as charted.

## 1.110) Pier ruins 0011

### Survey Summary

**Survey Position:** 40° 38' 56.2" N, 074° 04' 44.4" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-227.09:19:36 (08/15/2006)

### Hydrographer Recommendations

Retain charted ruins.

### S-57 Data

[None]

### Office Notes

Concur.

## 1.111) Pier ruins 0014 - disproved dol

### Survey Summary

**Survey Position:** 40° 38' 48.1" N, 074° 04' 29.6" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-244.09:46:30 (09/01/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 345\_1319  
**Contact/Point:** 0014/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

#### Remarks:

Charted ruins acquired with 200% Klein 5000 side scan. Dolphins not seen in charted positions.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/345_1319	0014	0.00	000.0	Primary
h11600/tj_3102_klein5000_sss100/2006-225/345_1319	0004	11.44	193.3	Secondary (grouped)

### Hydrographer Recommendations

Retain charted ruins. Remove charted dolphins.

### S-57 Data

[None]

### Office Notes

Concur with clarification. Retain ruins and remove seawardmost dolphin only.

## 1.112) Piles 0015 - disproved 3 piles

### Survey Summary

**Survey Position:** 40° 38' 53.5" N, 074° 05' 16.2" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-244.09:50:30 (09/01/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 345\_1319  
**Contact/Point:** 0015/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Three charted piles not seen in charted positions with 200% Klein 5000 side scan.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/345_1319	0015	0.00	000.0	Primary

### Hydrographer Recommendations

Remove the three charted piles.

### S-57 Data

[None]

### Office Notes

Concur.

**1.113) Foul area 0016 - retain as charted****Survey Summary**

**Survey Position:** 40° 38' 56.7" N, 074° 04' 52.6" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-257.02:42:34 (09/14/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 345\_1319  
**Contact/Point:** 0016/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Foul area acquired with 200% Klein 5000 side scan. Foul area shows no apparent obstructing or fowling objects, just sediment.

**Feature Correlation**

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/345_1319	0016	0.00	000.0	Primary

**Hydrographer Recommendations**

Retain foul area as charted due to lack of information on reason for classification.

**S-57 Data**

[None]

**Office Notes**

Concur.

**1.114) Pier ruins 0004 - Retain as charted****Survey Summary**

**Survey Position:** 40° 37' 25.5" N, 074° 04' 01.6" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]

## **1 - DR\_Unccharted**

## 1.1) Dolphin 0012

### Survey Summary

**Survey Position:** 40° 39' 07.5" N, 074° 05' 15.3" W  
**Least Depth:** [None]  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh) [None] ; TVU (TPEv) [None]  
**Timestamp:** 2006-226.07:55:15 (08/14/2006)  
**Survey Line:** h11600 / tj\_3102\_klein5000\_sss100 / 2006-225 / 175\_1349  
**Contact/Point:** 0012/1  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Uncharted dolphin acquired with 200% Klein 5000 side scan.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_klein5000_sss100/2006-225/175_1349	0012	0.00	000.0	Primary

### Hydrographer Recommendations

Chart dolphin.

### S-57 Data

**Geo object 1:** Mooring/warping facility (MORFAC)  
**Attributes:** CATMOR - 1:dolphin

### Office Notes

Concur.

## 1.2) Dolphin 0030

### Survey Summary

**Survey Position:** 40° 39' 06.8" N, 074° 05' 17.1" W

### Office Notes

Defer to MCD for charting recommendation.

## 1.19) Uncharted ruins 924/32

### Survey Summary

**Survey Position:** 40° 37' 38.5" N, 074° 04' 09.6" W  
**Least Depth:** 3.56 m (= 11.68 ft = 1.946 fm = 1 fm 5.68 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.980$  m ; TVU (TPEv)  $\pm 0.369$  m  
**Timestamp:** 2006-282.13:18:42.786 (10/09/2006)  
**Survey Line:** h11600 / tj\_3102\_reson8101 / 2006\_282 / 201\_1317  
**Profile/Beam:** 924/32  
**Charts Affected:** 12334\_1, 12333\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Uncharted pier ruins acquired with Reson 8101 MBES and 200% Klein 5000 side scan. Soundings were corrected to MLLW with verified water levels and final tide zoning.

### Feature Correlation

Address	Feature	Range	Azimuth	Status
h11600/tj_3102_reson8101/2006_282/201_1317	924/32	0.00	000.0	Primary

## 1.86) Obstruction 316/198

### Survey Summary

**Survey Position:** 40° 38' 13.0" N, 074° 02' 32.3" W  
**Least Depth:** 12.38 m (= 40.61 ft = 6.768 fm = 6 fm 4.61 ft)  
**TPU ( $\pm 1.96\sigma$ ):** THU (TPEh)  $\pm 0.980$  m ; TVU (TPEv)  $\pm 0.367$  m  
**Timestamp:** 2006-237.18:06:34.439 (08/25/2006)  
**Survey Line:** h11600 / tj\_3101\_reson8125 / 2006\_237 / 807\_1805  
**Profile/Beam:** 316/198  
**Charts Affected:** 12334\_1, 12327\_1, 12326\_1, 12300\_1, 13006\_1, 5161\_1, 13003\_1, 14500\_1

**Remarks:**

Sounding on an obstruction acquired with Reson 8125 MBES and 200% Klein 5000 side scan. Soundings were corrected to MLLW with verified water levels and final tide zoning.

#### Remarks:

Uncharted non-dangerous obstruction acquired with Reson 8101 MBES and 200% Klein 5000 side scan. Soundings were corrected to MLLW with verified water levels and final tide zoning. Evaluated by the hydrographer as not a DTON due to proximity to the security area and shoal area.

TIDES AND WATER LEVELS

September 22, 2006

MEMORANDUM FOR: Chief, Requirements and Development Division, N/OPS1

FROM: CDR Raymond C. Slagle, THOMAS JEFFERSON

SUBJECT: Request for Approved Tides/Water Levels

Please provide the following data:

1. Tide Note
2. Final zoning in MapInfo and .MIX format
3. Six Minute Water Level data (Co-ops web site)

Transmit data to:

NOAA/NOS/Atlantic Hydrographic Branch  
N/CS33, Building #2  
439 West York Street  
Norfolk, VA 23510  
ATTN: Chief AHB

These data are required for the processing of the following hydrographic survey:

Project No.: OPR-B310-TJ-06  
Registry No.: H11600  
State: New York  
Locality: New York Harbor  
Sublocality: Upper Bay

Attachments containing:

- 1) an Abstract of Times of Hydrography,
- 2) digital MID MIF files of the track lines from pydro on CD/diskette

TIDE NOTE FOR HYDROGRAPHIC SURVEY

DATE : February 06, 2007

HYDROGRAPHIC BRANCH: Atlantic

HYDROGRAPHIC PROJECT: OPR-B310-TJ-2006

HYDROGRAPHIC SHEET: H11600

LOCALITY: Upper Bay, New York Harbor, NY

TIME PERIOD: August 13, 2006 - September 18, 2006

TIDE STATION USED: 853-9483 Bergen Point, NY

Lat. 40° 38.20' N Long. 74° 08.5' W

PLANE OF REFERENCE (MEAN LOWER LOW WATER): 0.000 meters

HEIGHT OF HIGH WATER ABOVE PLANE OF REFERENCE: 1.582 meters

REMARKS: RECOMMENDED ZONING

Use zone(s) identified as: NY3, NY17, NY18, NY19, NY20 and NY21.

Refer to attachments for zoning information.

Note 1: Provided time series data are tabulated in metric units (meters), relative to MLLW and on Greenwich Mean Time on the 1983-2001 National Tidal Datum Epoch (NTDE).

Chris, just to follow up;

NO 1.1, Buoy 9 was position checked and found to be on station.

NO 1.3, OR/W can has been removed. This aid was disestablished soon after you did your survey work in the area.

The only one we are still waiting on is NO 1.2 Buoy 27. KATHERINE WALKER will be checking that one next week.

Let me know if you have any questions.

Thanks  
Curt

Hi, Curt,

I have attached the proposed DTOM report to this e-mail. The noncharted buoy you are speaking of is feature number 1.3 of the list at the bottom of the page. Also, I know you and I spoke of the two out-of-position buoys at Rockaway Channel. I assume you will either move those back to their assigned charted positions or send out a NTM for them, correct? I just need to know so that we can justify not sending out DTOMs on them for our final survey reports to the Atlantic Hydrographic Branch.

Thanks much,  
Chris

Chris, will look into the White and orange can.

The Rockaway buoys were put back on station. LNM 44/06 verifies the move

Red Number 8, new position is 40-39-22.29N / 074-04-13.01W. This buoy was temporarily moved, but this is its new permanent position. It should be coming out in the next LNM.

Will get back to you on 9 and 27.

Thanks

LCDR/Chris-

Concur with LCDR McBrady's comments. Also be advised of the status of the below AtoN.

\* "9" - ANT New York Aid. In turning basin by golf course. Possibly on list to be disestablished (CWO Barthel)???

\* "27" - KATHERINE WALKER. Will position check next week during course of normal operations and put back on station as needed.

\* Orange/White Can - Private AtoN (POC - CWO Barthel)

\* "8" - Bayonne Ocean Terminal aid. Was found offstation during servicing in October. Relocated for Intrepid move. BNM/LNM issued.

v/r  
Amy

Amy/Chris,

It would be my preference NOT to submit a DTOM for any AtoN that is off station (OFFSTA). Traditionally, the USCG has not handled OFFSTA aids in that manner (i.e. publishing them as chart corrections) since it is our policy to simply put them back whenever we find out that they are OFFSTA. When we are notified, we will advertise the aid as OFFSTA or missing depending on the distance it's off

Another reason a DTOM report is overkill here is that there are a number of aids that are in temporary positions due to dredging. Over the past few months, we have discovered several aids that were put in temporary positions to accommodate dredging work and then "the USCG" forgot to move them back.

I think the best policy will be for NOAA to let the SECNY AtoN officer (CWO2 Barthel) know when they find our AtoN "not on charted position" and we will follow-up from there.

On the subject of the white can w/ orange band, over by the Bayonne Ocean Terminal (MOTBY). Is this aid directly off the end of the pier? There used to be as many as three over there, for reasons I don't know, but most likely a Private AtoN (PATON) customer (perhaps the dry-dock operator) who used to maintain those aids has redeployed them w/o notifying the CG. SECNY is a good fit to run this down as well, and for this reason we are working with CGD1 to take over the PATON administration program for the aids in our AOR.

Bottom line is we have not always maintained good enough situational awareness of both CG maintained and PAtoN. We are working to improve that and appreciate the help from NOAA in finding these errors. But as a rule, our preference will always be to put OFFSTA AtoN back and skip the DTOM process. Notifying CWO Barthel and BM1 Casey (PATON manager) - so that we can engage the servicing units - is the best bet from my perspective.

Sorry. Here's the attachment

[christiaan.vanwestendorp@noaa.gov](mailto:christiaan.vanwestendorp@noaa.gov) wrote:

Hi, Amy,

I have attached the first page of a report that we may or may not put out as a Danger to Navigation report, based on your assessment. We found three buoys out of position by at least 50 meters and one buoy (a white and orange can) that was uncharted around Military Ocean Terminal. I already notified LCDR McBrady of one or two of these via a chartlet I sent him a while back in preparation for the INTREPID moving over there. If you can confirm that these buoys are where we say they are, then we will submit a DTOM report for them. However, if they have since been moved back to their charted positions (and/or the W Or C buoy has been removed), then please let me know, and the DTOM report will not be sent out. The uncharted buoy is feature number 1.3 in the list at the bottom of the attached page. Please let me know if you have any questions, and I promise I will have chartlets ready for you soon, as you requested a month or two ago.

Thanks,

Chris, Fieldsheets 10,11,16,20,21,27,28,30,31,34,35, 36, and 37 all had problems with the outer beams. The trouble beam numbers were 90-101 for the Reson 8101. I will have to mention something about those beams.

All of the crossline comparisons can be found at

H:\H11600\Descriptive Report\Separates\IV\_Crossline\_Comparisons.

**To:** Christiaan VanWestendorp <Christiaan.VanWestendorp@noaa.gov>, Castle E Parker <Castle.E.Parker@noaa.gov>, Tod Schattgen <Tod.Schattgen@noaa.gov>

Hi Chris (Helen says Hi also)

Got the data today. The problem is still there and distinctive. From beam 82 on out to 101 the quality and accuracy severely degrades. You can see this in the excel sheet attached, in data and graph form.

Here is what Gene, Helen and I think may be the cause of these outer beam problems:

Helen and I double checked to ensure this is not a roll issue or systematic error and did not see anything to suggest it is caused by roll.

1) Is the 8101 out of calibration? - Re-calibrate the instrument and do a small patch test (complete, as per procedures) and check that data with this core set of data, see if there is any change. This also allows you to double check the settings to ensure there has not been any drift since the last patch test.

2) It may be hull interference? - check the mounting, check the bolts (we doubt this is the problem but it is worth double checking), and check with Reson for any way of determining if it is a mounting issue. The rep that was there when I was there did question whether it might be hull interference or interference from the pole. Run the BITE check he suggested to rule out any internal problems.

But if it is not either of these, it may be damage:

3) Transducer damage or internal fault? - Did the transducer take a bit of damage that may be causing these outer beam problems, or is it an internal system fault.

This error really showed up only as you got deeper in depth, because with depth comes a larger swath width.

The error this problem creates is upwards of 40-50 cm, a half meter error is too great. This is evident when using all the beams. If you filter the data 60-60, you remove beams 1-9 and 95-101, reducing your error value to approx. 20-30cm. This falls within specs. However, as you can see in the file attached, your CARIS computed accuracy still drops below 95% at beam 82. When using the Jack Riley Absolute Error values, you rise to nearly 100% accuracy. If you choose to use the absolute error values, you must detail that in the DR. I would suggest quoting Jack Riley as I did from his email (which I can send to you if you need it).

A method to resolve this error is to filter all the 8101 data at 60-60 degrees of nadir. This keeps your error rate to an acceptable 20-30 cm. (You might even consider filtering 65 degrees to port and 55 degrees to starboard. This should remove beams 90 on out and let you keep the beams 5-9 that were within Order 1 95% quality.)

I would suggest you do a CARIS QC Report first, using both CARIS Order 1 and the Riley Absolute Error values, document it, then filter the data, re-run the QC report and document the results. Be sure to include the report with the DAPR and detail this issue in the survey DRs.

Also, notice the dip in the data at nadir beams 51-56 on chart 1. I believe this may be a sediment related issue, perhaps in this area due to the power the 8101 was set at the nadir beams were penetrating deeper and thus you had blowout that affected the accuracy %. The 2nd chart does not show this dip, as I had cleaned out the nadir blowouts and filtered at 60 degrees.

I have saved this QC report in the TJ DAPR folder here at the branch. I would suggest you do the same, and submit it with the New York surveys.

Hope you are making good progress despite this issue, take care. Write if you have any further questions.

**To:** Raymond C Slagle <Raymond.C.Slagle@noaa.gov>, Christiaan VanWestendorp <christiaan.vanwestendorp@noaa.gov>, Kimberly Glomb <Kimberly.Glomb@noaa.gov>

While we were over at the fireboat this morning the Pilot Joe Giuardi (check spelling) pointed out a shoal he was concerned about.

His boat has twin transducers on each side and he picked up a 5-6 ft shoal that was in between contours of the 12 and 18 foot curve. This is 40 meters north of the charted 5 ft . I looked at our depths and it looks like we have only coverage up to 22 -25 feet. I am also puzzled as to whether we have a registry problem too! He was nice enough to let us aboard maybe we could resolve this chart discrepancy. Included is an image. Peter

Kim,

I believe we have found all of the areas where there is a precise timing latency in the data for H11600. The days are DN's 228, 230, 232, 233, 234, 235, and 261.

There is a file that will be included with the surveys that explains the reasoning behind these errors. For more info on the file or on how to explain it in the DR, contact the FOO.

Bill

**Date:** Thu, 24 Aug 2006 15:11:31 -0400

**To:** Christiaan VanWestendorp <christiaan.vanwestendorp@noaa.gov>

FOO,

Through the rest of my looking at the data today, I found areas in days 230, 233, 234, and 235 that showed changes in the precise timing latency. For each day, there were areas in the data that would have busted the error budget. As such, I have analyzed the data and applied the appropriate values in the HVF. I have re-SVP corrected the data and remerged the data. All days show marked improvement with regards to precise timing after the new offsets have been applied.

**To:** Christiaan VanWestendorp <christiaan.vanwestendorp@noaa.gov>

Hi FOO,

I did notice on a few occasions that there was some strumming on the outside of the SSS swath today. On those occasions I asked the driver to slow down a knot and the problem went away. We had been driving into a strong current and were traveling over 10kts through the water with speed over ground about 7 1/2 kts.

I don't have any evidence that suggests that the fish is loose.

**To:** Christiaan VanWestendorp <Christiaan.VanWestendorp@noaa.gov>

Hi Chris,

Breaking the sheet into sections for ease of data acquisition and processing is fine. Whatever is easiest and most efficient for you is fine by us.

In terms of submitting the survey to AHB, we want to maintain it as one sheet (i.e., one survey with a single descriptive report). I am not sure how breaking the sheet up into three areas would get the data to the branch quicker, but I may not have thought that through as thoroughly as you all have- Let me know what your thinking is on that point.  
-Jeremy

Christiaan VanWestendorp wrote:

Hi, Jeremy,

I was talking with my CO and CDR Schattgen this afternoon, and it seems like it would be much easier to complete Sheet A of NY Harbor if it were broken up into multiple sections. I would like to see it broken up into three sections. This way, the survey becomes a little more of a manageable ordeal for my sheet managers (since in all likelihood there will be a million contacts out there to deal with), and we can get the data out to the branch faster. What do you think?

The lines that we would use to break up the sheet into three sections fall between the following lat/long's:

Line between Sheet A-1 (north) and A-2 (middle):  
40-40'37.56" N 074-03'16.92" W  
40-39'56.16" N 074-01'04.08" W

Line between Sheet A-2 (middle) and A-3 (south):  
40-38'36.96" N 074-04'12.00" W  
40-38'09.24" N 074-02'22.20" W

**From:** "scientist1.thomas.jefferson" <scientist1.thomas.jefferson@noaa.gov>  
**Date:** Tue, 25 Jul 2006 16:49:03 +0000  
**To:** Shepard Smith <shep.smith@noaa.gov>, doug.baird@noaa.gov, caleb.gostnell@noaa.gov, michael.riddle@noaa.gov, jeremy.mchugh@noaa.gov, tod.schattgen@noaa.gov, shawn.maddock@noaa.gov, foo.thomas.jefferson@noaa.gov

Good afternoon all,

From instructions for OPR-B310-TJ-06:

*"Navigable area hydrographic surveys with a combination of 100% multibeam (MB) coverage and 200% side scan sonar (SSS) coverage are required for this project.*

...  
*At the Commanding Officer's discretion, extremely rocky areas, or where SSS are impractical due to entanglement hazards can be examined with 100% multibeam only."*

My interpretation of this is that areas where the chance of getting good SSS coverage is poor will be surveyed with ODMBES, whilst other areas will have the OD requirement met by SSS and should thus go for Complete MBES. Again, however, I can see how a field unit accustomed to using OD MBES consistently would interpret this instruction to mean OD MBES across the board. The TJ STs are busy struggling with how, exactly, to draw line plans for B310 as I type this. On this end, I have spoken to both outgoing and oncoming FOOs on the TJ and the FOO on the RU, encouraging them to get in touch with HSD if they feel their letter instructions are vague, excessively onerous, or potentially excessively time-consuming.

Cheers,  
Helen

The points you brought were discussed this morning - and we have noted that the lack of specifically identifying the survey standard (object detection vs. complete coverage) is something we should include in the Letter Instructions, and we will include a statement to that effect in future LI's. In fact, this fall Ops Branch intends to ream out the LI template and reduce the verbiage so that relict terms, and confusing directions are eliminated - references to the FPM and HSSD will replace substantial parts of the current LI's.

There is however guidance to the field in the current FPM in regards to the survey standards expected - section 2.5.2. of the FPM states: "Unless otherwise specified by the LI, both SSS and MBES data acquisition shall be conducted to meet object detection criteria set forth in the HSSD." Ops Branch will include a clarification, that object detection standard does not require both SSS & MBES acquisition to object detection standards, but can be either or a combination of both sensors (hopefully in a more clear sentence than this).

Doug

TJ Officers,

Helen's interpretation of coverage requirements for the NY Harbor project (below) is correct. For clarity, I have copied her quotes from our instructions and inserted the terms Object Detection multibeam and Complete multibeam where appropriate:

*"Navigable area hydrographic surveys with a combination of Complete multibeam (MB) coverage and 200% side scan sonar (SSS) coverage are required for this project.*

...

*At the Commanding Officer's discretion, extremely rocky areas, or areas where SSS are impractical due to entanglement hazards can be examined with Object Detection multibeam only."*

As always, please contact Operations Branch directly if you have any questions about project instructions.  
-Jeremy

CO,

I recommend that the ship come to an understanding with HSD about the 200%SSS requirement for this project. If the ship is not used, you guys will not have any way to acquire SSS data in depths deeper than 20 meters (unless you tow a Klein 3000 from a launch) and meet NOS requirements.

HSD could change the defalt wording for SSS operations from "At the Commanding Officer's discretion, extremely rocky areas, or where SSS operations are impractical due to entanglement hazards can be examined with 100% multibeam only. "

to "At the Commanding Officer's discretion, exremely rocky areas where SSS operations are impractical due to entaglement hazards or areas of high traffic congestion can be examined with 100% multibeam only."

Also, they show TJ having completed an area on Sheet B (H11400), but TJ did no work down there in 2004 (they may have mislabeled NRT work).

----- Original Message -----

Ray, Jim, Marc and Chris:

Preliminary instructions for your New York Harbor and Approaches project are attached. Please review the document carefully and let me know if you have any questions or concerns by Friday June 30th. I plan to send out the final instructions on or slightly before July 7th.

Here are the project instruction highlights:

- four prioritized sheets that require 100% MB and 200% SSS coverage where possible
- three separate junction surveys; 2 completed by NRT-5 (Jasper Schaer is your point of contact for getting that data) and 1 completed by TJ in 2004 in the East River (H11353)- Marc, do you have H11353's data on board TJ?
- 99 AWOIS items assigned for full investigation
- 97 AWOIS items provided for background information only

-Jeremy

**ATLANTIC HYDROGRAPHIC BRANCH  
EVALUATION REPORT to ACCOMPANY  
SURVEY H11600 (2006)**

This Evaluation Report has been written to supplement and/or clarify the original Descriptive Report. Sections in this report refer to the corresponding sections of the Descriptive Report.

## **B. DATA ACQUISITION AND PROCESSING**

### **B.1 DATA PROCESSING**

The following software was used to process data at the Atlantic Hydrographic Branch:

HSTP PYDRO version 8.7 r2537  
CARIS HIPS/SIPS version 6.1 SP2 HF 1-4  
CARIS Bathy Manager version 2.1 HF 1-10  
DKART INSPECTOR, version 5.0 Build 732 SP1  
CARIS HOM version 3.3  
CARIS S57 Composer version 2.0 HF 1-2

### **B.2. QUALITY CONTROL**

#### **B.2.1. H-Cell**

The AHB source depth grid for the survey's nautical chart update product entailed the field's original 1m grids, combined at 2 meter resolution. The survey scale selected soundings were extracted from this combined surface. The selected sounding set is approximately 10 to 20 times the number of charted depths. The chart scale selected soundings are a subset of the survey scale selected soundings. The surface model was referenced when selecting the chart scale soundings, to ensure that the selected soundings portrayed the bathymetry within the common area.

The pre-compilation products or components (Stand Alone HOB files (SAHOB)) included sounding selections (SOUNDG), features (SBDARE, UWTROC, WRECKS, OBSTRN, PILPNT, MORFAC), Meta objects (M\_COVR, M\_QUAL, M\_NSYS), and cartographic Blue Notes. The individual SAHOB files were inserted into one BASE Manager feature layer and exported to S57 format in order to create the H-Cell deliverable.

The completed H-Cell was exported as a Base Cell File (ENC.000) in S-57 format with all values in metric units. The metric equivalent ENC.000 file was then converted to NOAA chart units (ENC\_CU.000) with all values measured in feet following NOAA sounding rounding rules.

Chart compilation was performed by Atlantic Hydrographic Branch personnel in Norfolk, Virginia. Compilation data will be forwarded to Marine Chart Division, Silver Spring, Maryland.

The H11600 CARIS H-Cell final deliverables include the following products:

US511600_CS.000	1:10,000 Scale	H11600 H-Cell with Chart Scale Selected Soundings and Cartographic Notes
US511600_SS.000	1:10,000 Scale	H11600 Selected Soundings (Survey Scale)

## B.22. Junctions

Survey H11600 (2006) junctions with surveys H11601 (2006) to the south and H11400 (2006) to the southeast. Present survey soundings compare within 1 foot with junctioning surveys. Present survey depths are in harmony with the charted hydrography to the north.

## D. RESULTS AND RECOMMENDATIONS

### D.1 CHART COMPARISON    **12334 (69th Edition, Aug./08)**

Corrected through NM 8/30/2008

Corrected through LNM 2/26/2008

Scale 1:10,000

### **12402 (10th Edition, May/06)**

Corrected through NM 5/06/2006

Corrected through LNM 5/02/2006

Scale 1:15,000

### ENC Comparison

### **US5NY1CM**

New York Harbor Upper Bay and Narrows Anchorage

Edition 18

Application Date 2008-02-21

Issue Date 2008-02-26

Chart 12334

### **US5NY1DM**

Hudson and East Rivers - Governors Island to 67th Street

Edition 11

Application Date 2008-11-20

Issue Date 2008-11-20

Chart 12335

### **D.1.1 Hydrography**

The charted hydrography originates with prior surveys and requires no further consideration. The hydrographer makes adequate chart comparisons in section "D" and Appendix 1&2 of the Descriptive Report.

## D.3. MISCELLANEOUS

Chart compilation was done by Atlantic Hydrographic Branch personnel, in Norfolk, Virginia. Compilation data will be forwarded to Marine Chart Division, Silver Spring, Maryland. See Section D.1. of this report for a list of the Raster Charts and Electronic Navigation Charts (ENC) used for compiling the present survey.

#### **D.4. ADEQUACY OF SURVEY**

The present survey is adequate to supersede the charted bathymetry within the common area. Any features not specifically addressed either in the H-Cell BASE Cell File or the Blue Notes should be retained as charted. Shoal areas with only crossline coverage were excluded from the Meta coverage areas. Refer to the Descriptive Report for further recommendations by the hydrographer.

**APPROVAL SHEET**  
**H11600**

**Initial Approvals:**

The completed survey has been inspected with regard to survey coverage, delineation of depth curves, representation of critical depths, cartographic symbolization, and verification or disproval of charted data. All revisions and additions made to the H-Cell files during survey processing have been entered in the digital data for this survey. The survey records and digital data comply with National Ocean Service and Office of Coast Survey requirements except where noted in the Descriptive Report and the Evaluation Report.

All final products have undergone a comprehensive reviews per the Hydrographic surveys Division Office Processing Manual and are verified to be accurate and complete except where noted.

---

**Sarah M. Eggleston**  
Physical Scientist  
Atlantic Hydrographic Branch

I have reviewed the H-Cell files, accompanying data, and reports. This survey and accompanying Marine Chart Division deliverables meet National Ocean Service requirements and standards for products in support of nautical charting except where noted.
