

Descriptive Report to Accompany Hydrographic Survey H11669

The survey area was broken down into six sub-areas to allow for more efficient data processing and data management. The sub-areas were defined based on the predicted data set sizes prior to survey commencement. Subarea 1 is split by tidal zones WGM286, WGM376, and WGM375. Subareas 2 and 3 are split by tidal zones WGM375 and WGM376. Subareas 4, 5, and 6 are split by tidal zones WGM286 and WGM376. Tidal data from the Calcasieu Pass tide station (8768094) was used to process all of the tidal data. The following sketch shows the layout of the tidal zones and subareas.
