Remarks:

The purpose of this survey is to provide contemporary surveys to update National Ocean Service (NOS) nautical charts. All separates are filed with the hydrographic data. Any revisions to the Descriptive Report (DR) generated during office processing are shown in bold red italic text. The processing branch maintains the DR as a field unit product, therefore, all information and recommendations within the body of the DR are considered preliminary unless otherwise noted. The final disposition of surveyed features is represented in the OCS nautical chart update products. All pertinent records for this survey, including the DR, are archived at the National Centers for Environmental Information (NCEI) and can be retrieved via <http://www.ncei.noaa.gov/>.

Area Surveyed

This topo-bathy lidar survey was acquired by NOAA's National Geodetic Survey Remote Sensing Division (RSD) using a Riegl VQ820G. The data set contains outer coast and inlet data along the Florida Keys in the area surrounding the Key West National Wildlife Refuge. Survey dates extend from 04/11/2014 to 04/22/2014.

Products delivered to AHB from RSD included a survey 5 meter BAG/CSAR surface, preliminary shoreline and intertidal shapefiles referenced to Mean High Water and Mean Lower Low Water, and orthoimagery.
